Batch Processing

Master Data Set-up

1) Change your cost center settings as highlighted below. Enable Batch Processing

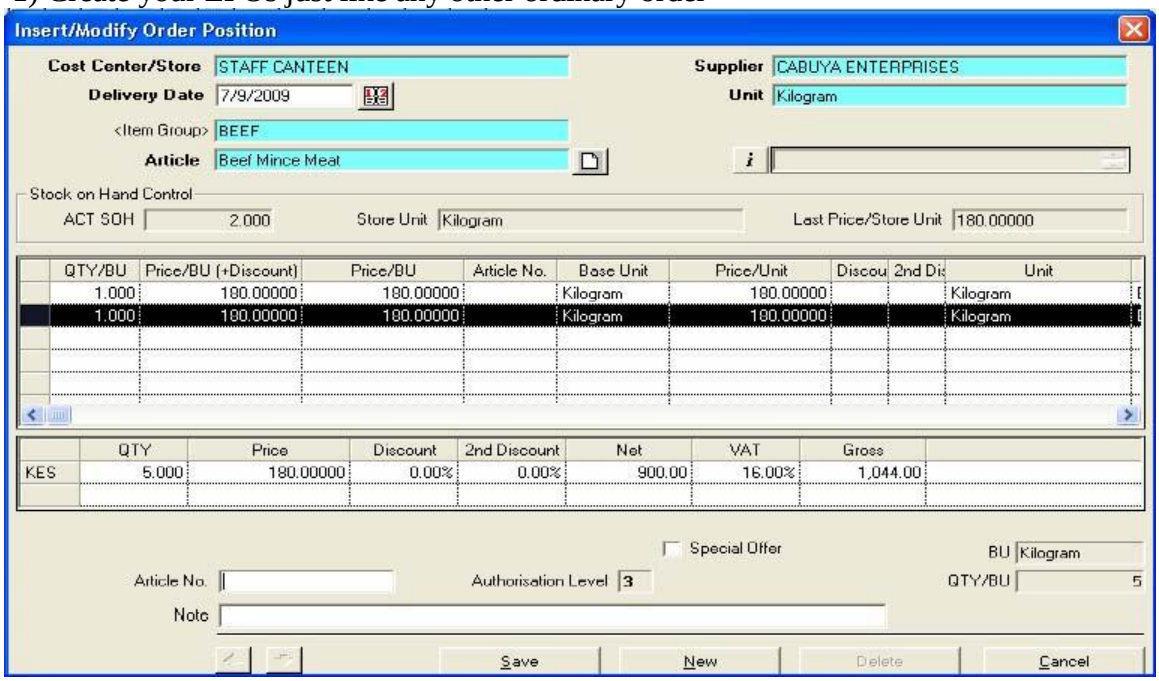

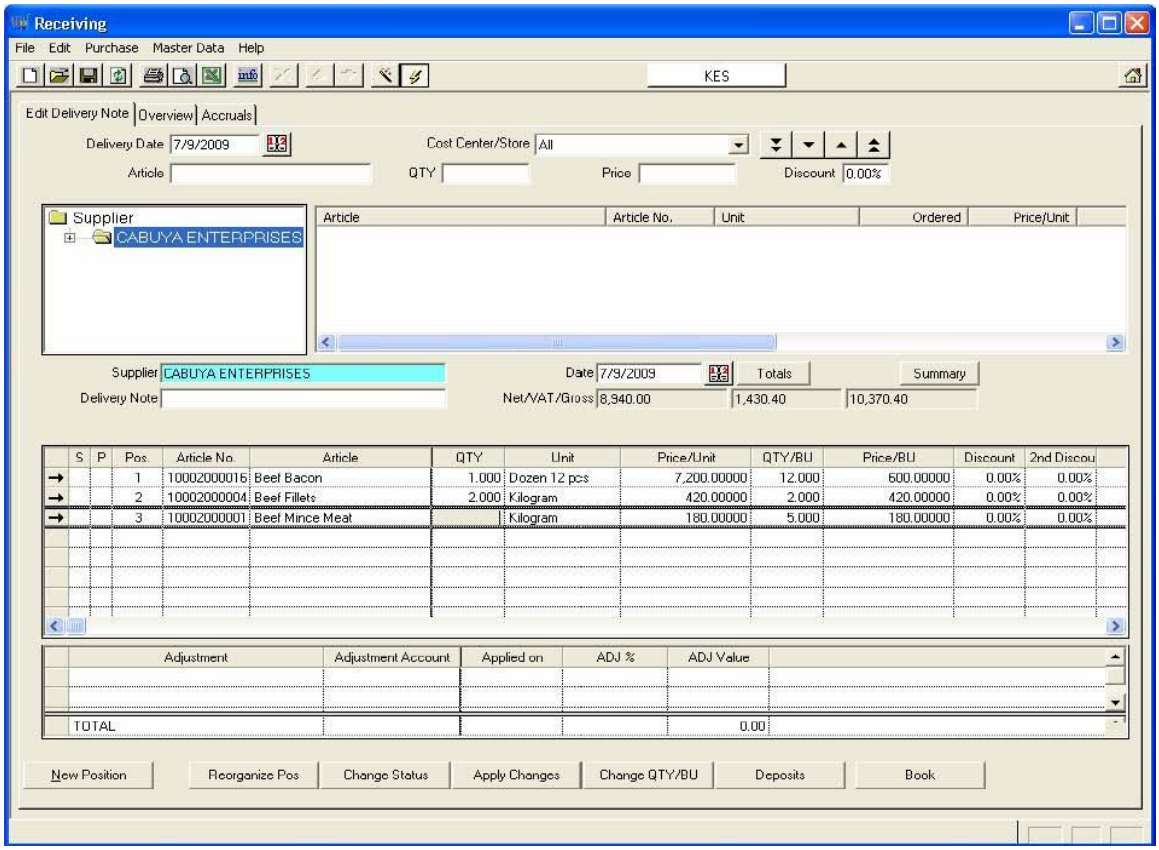

2) Go to Master Data>Articles and Tick HACCP per article (Do this for all articles you want to implement batches)

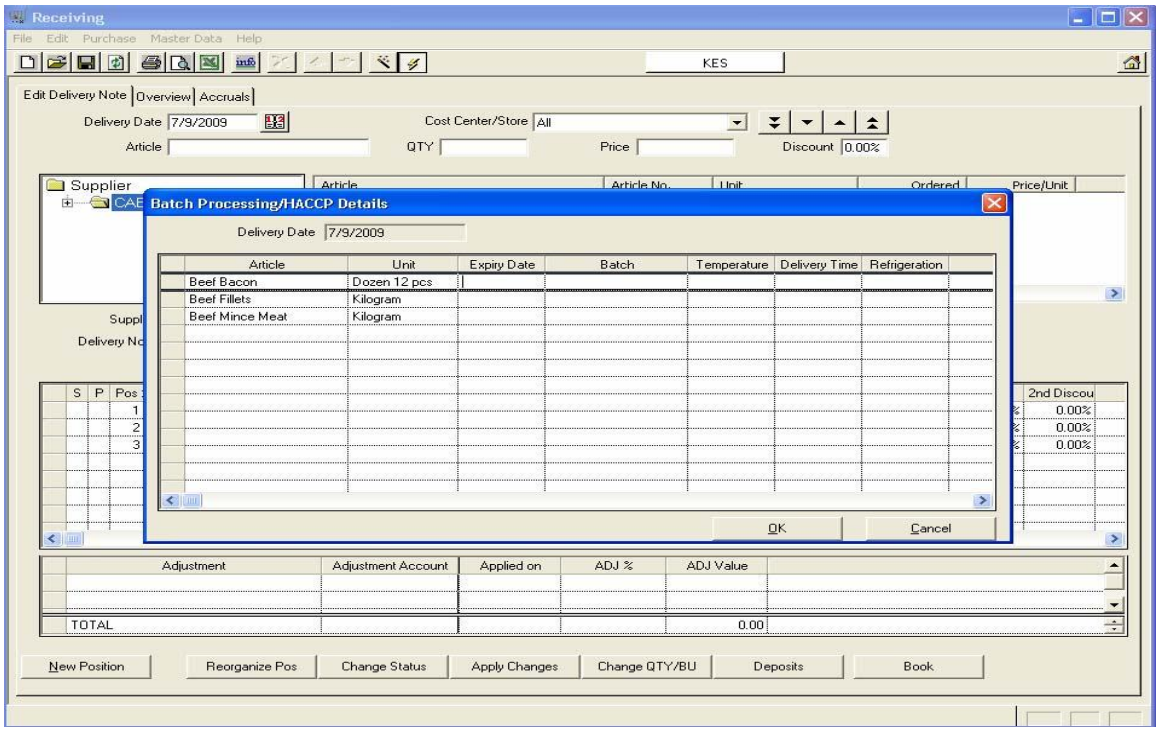

Purchasing and Receiving

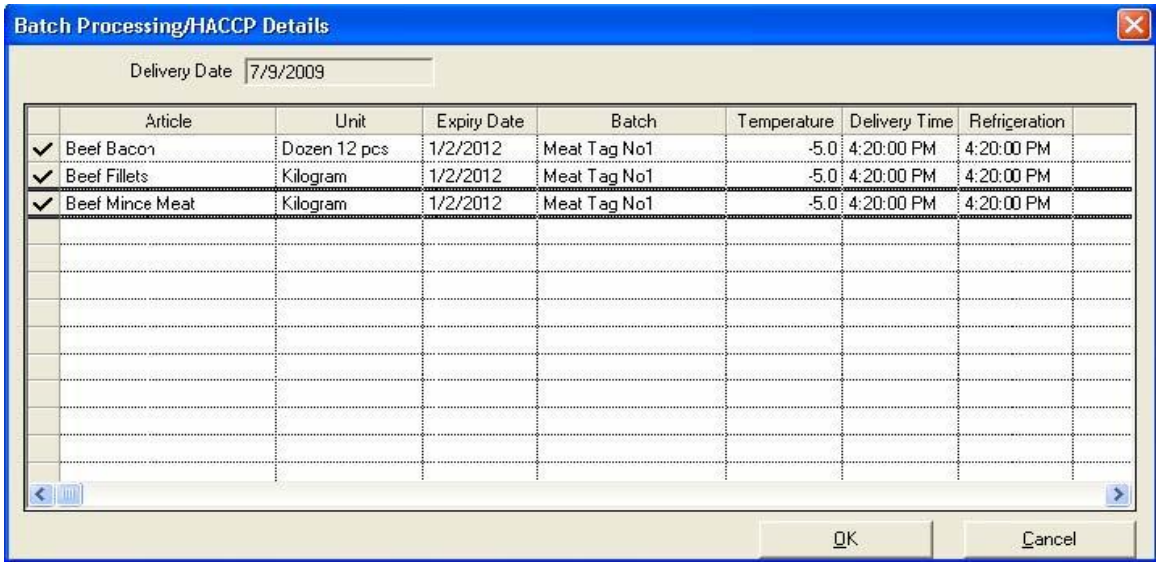

1) Create your LPOs just like any other ordinary order

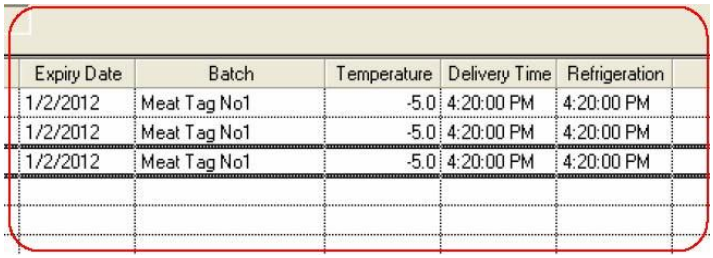

Book the Goods Received Note the following screen will appear

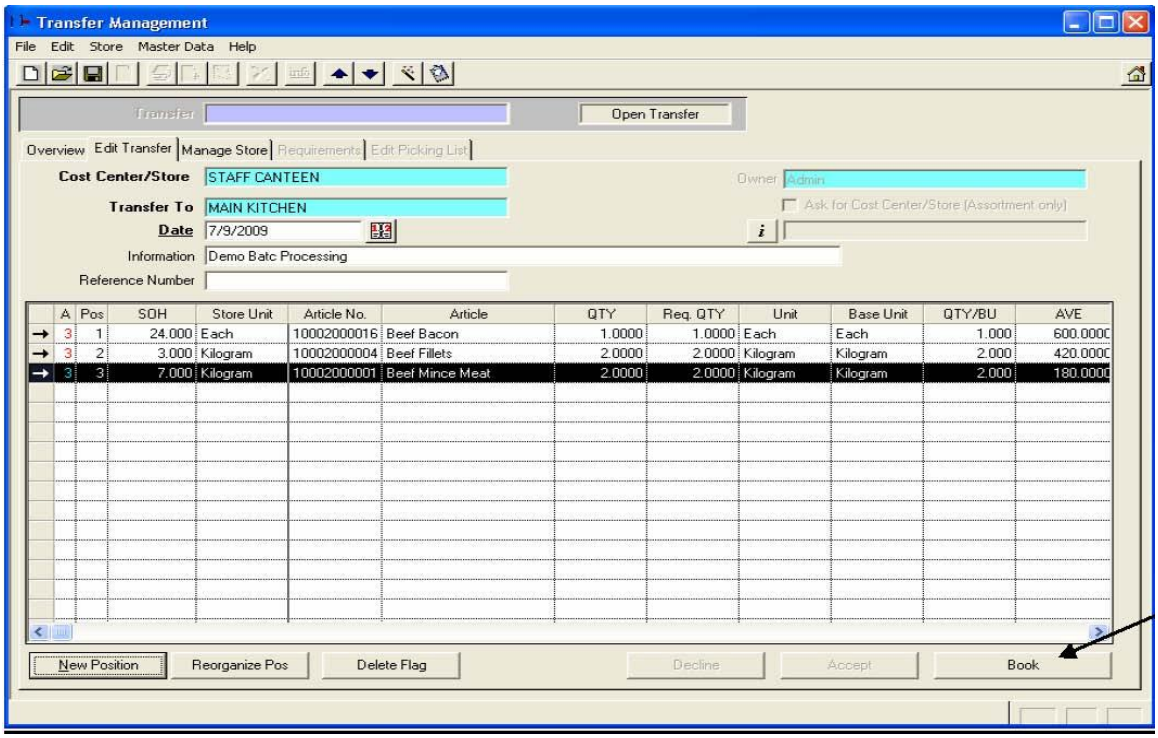

2) Fill the fields accordingly

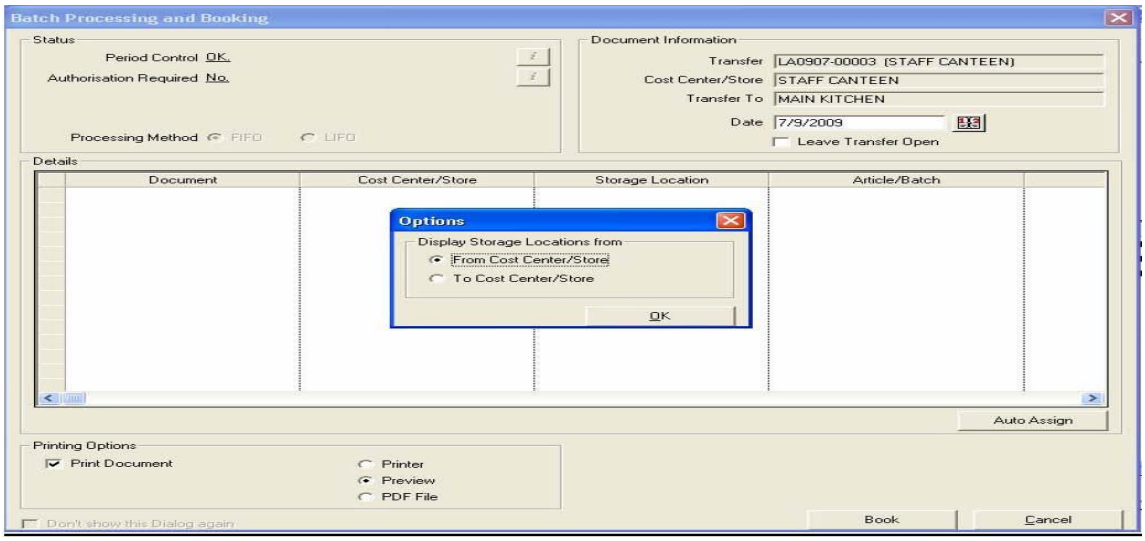

Issue Request and Transfers

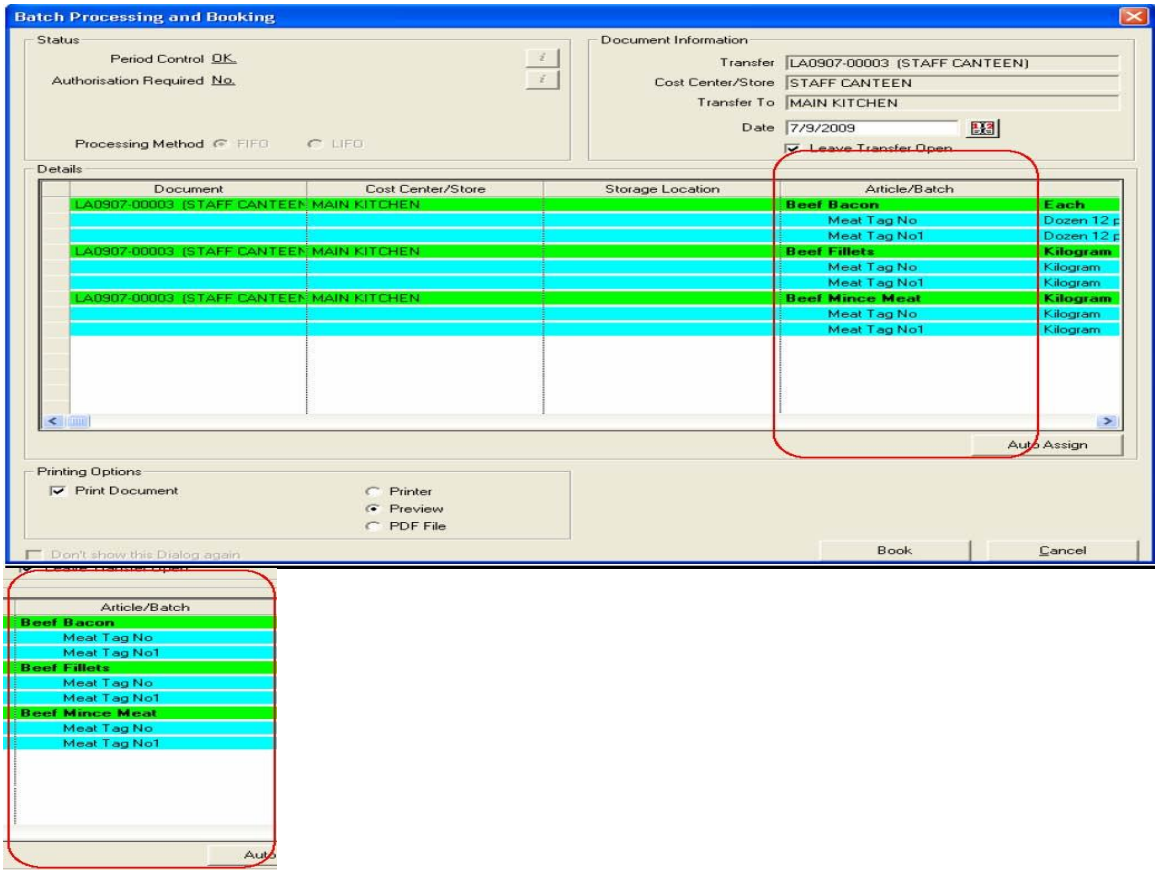

1) Issue Requests will be done the same way as the current requests. For Transfers find the details below

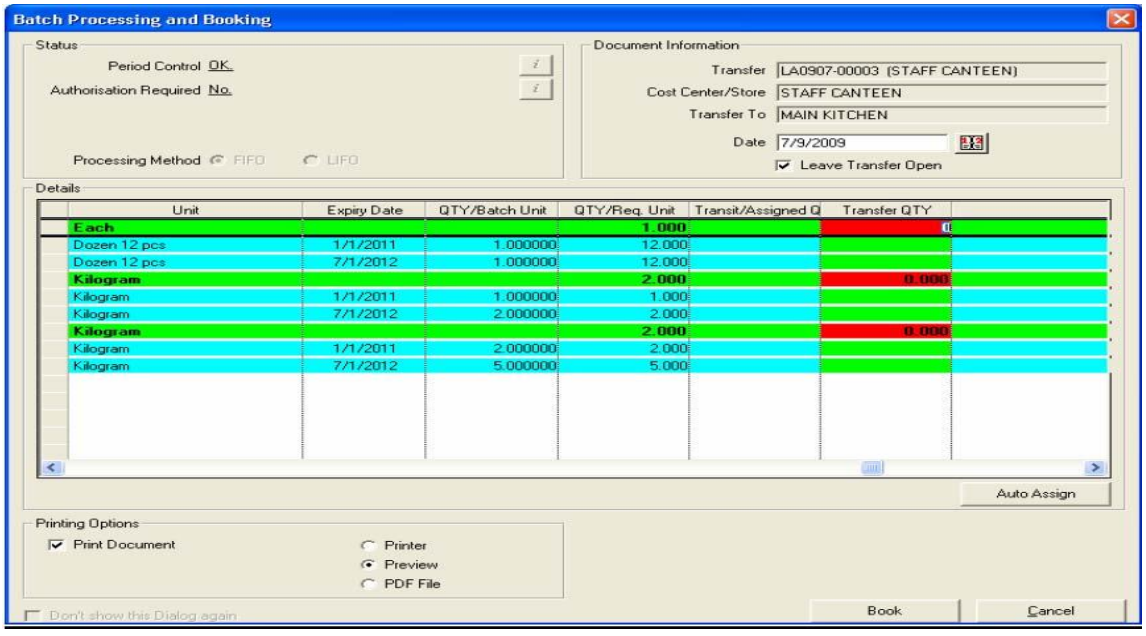

2) Click on Book and the following for Batches screen appears

3) Click Ok with and Batches in the Store you are transferring from will be shown e.g. below

4) Enter the quantity to transfer which should be the entire batch received

STAFF CANTEEN	10002000004	Beef Fillets	Kilogram	Meat Tag No1	1.000000	1.000	7/1/2012	7/9/2009	-5.0	Kiogram
STAFF CANTEEN	10002000001	Beef Mince Meat	Kilogram	Meat Tag No1	5.000000	5.000	7/1/2012	7/9/2009	-5.0	Kiogram

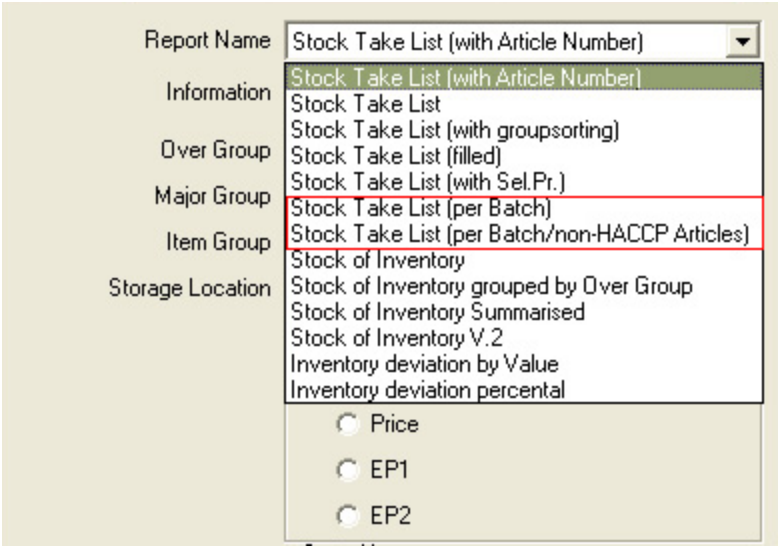

Stock Taking

Stock taking procedures for batch processing is different from the other non batched items. Closing stock has to be counted per batch as well.

1) Generation of inventory is still the same done in the same way

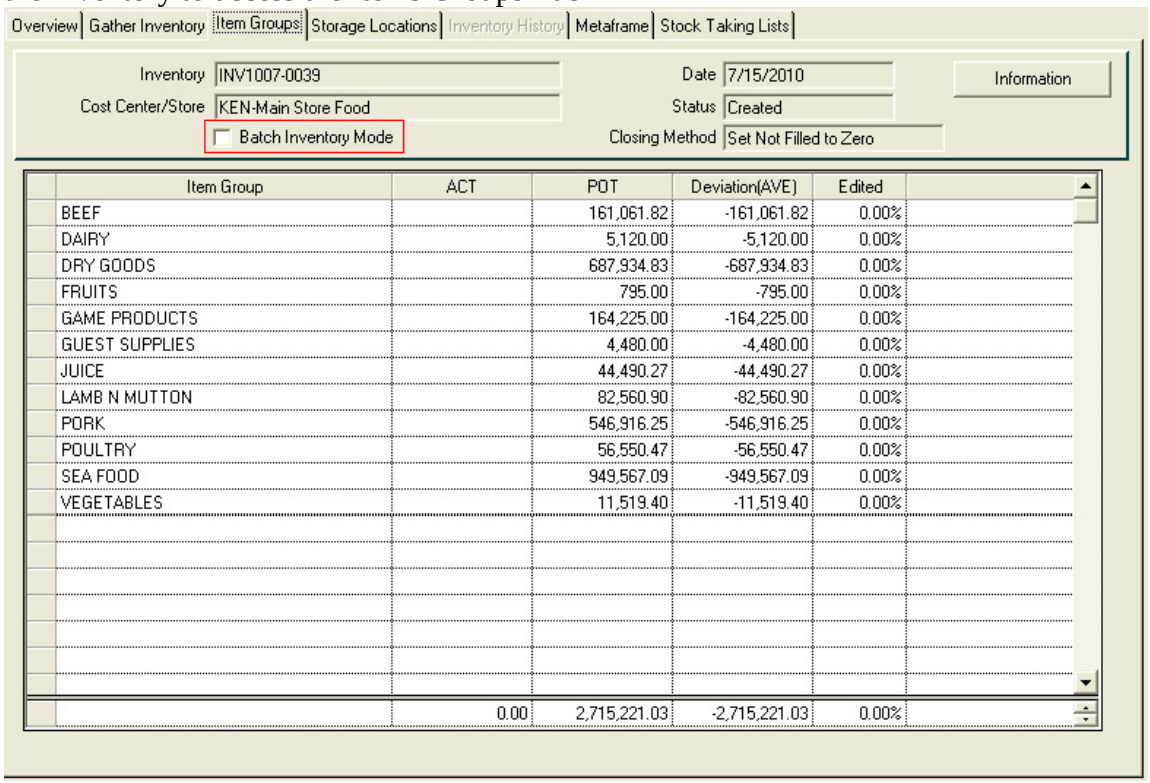

2) Counting of inventory Must be done per batch. Choose any of the two batch processing stock take reports
