Materials Control Procedures for Generating Food Cost Report.

The following document is meant for generating a Food / Beverage Cost report from the system. This report depends on the correct posting of:

- Transfers (*reflecting the correct nett prices for the items issued out*) and
- Usages (*usages use the cost prices of the items posted*)

The food / beverage cost report is calculated as follows:

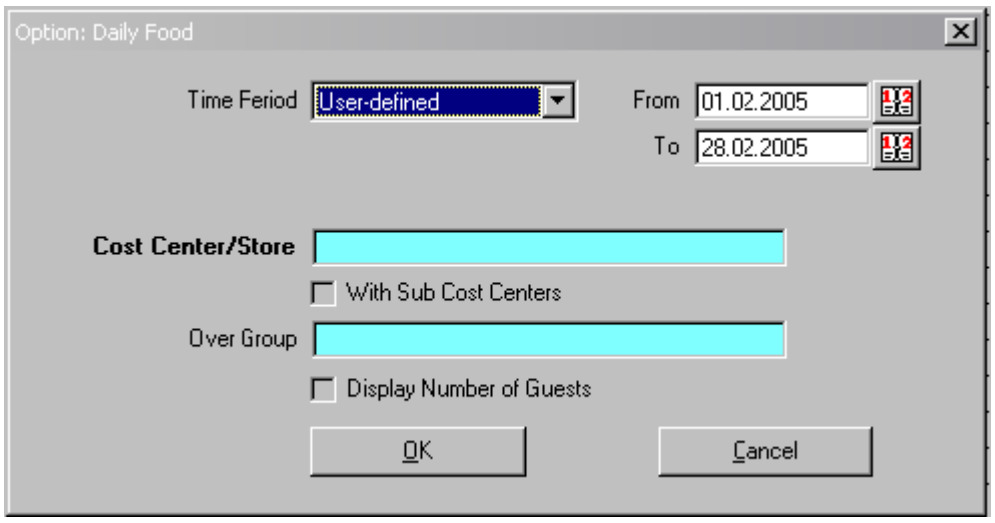

Transfers – Usages = Cost of Sales

Cost of Sales ÷ Sales X 100 = Food / Beverage Cost %

Click on the Daily Food icon under the Result short-cut bar.

The following window appears:

Time Period : Select User-defined **From :** *Enter Date Range*
To : *Enter Date Range*

Cost /Store : Select **Food / Beverage Costs**
(*Short-cut for this is 123 then press Enter)*

Tick the check box **'With Sub Cost Centers'**

Over Group : Select "Food" for a Food Cost Report
Select "Beverage" for a Beverage Cost Report

Click OK

The window that appears after this stage contains the information for the food / beverage cost report.

Click on the Print Preview icon at the top to view an on-screen display of the food / beverage cost report. 

To get a print-out of the food / beverage cost report click on the print icon. 

Note:

- To generate a food / beverage cost report for one day enter the same date in the From – To date range fields.
- To generate a food / beverage cost report for a period of time enter the date range in the From – To date range fields.
