Materials Control Procedures for Production Articles.

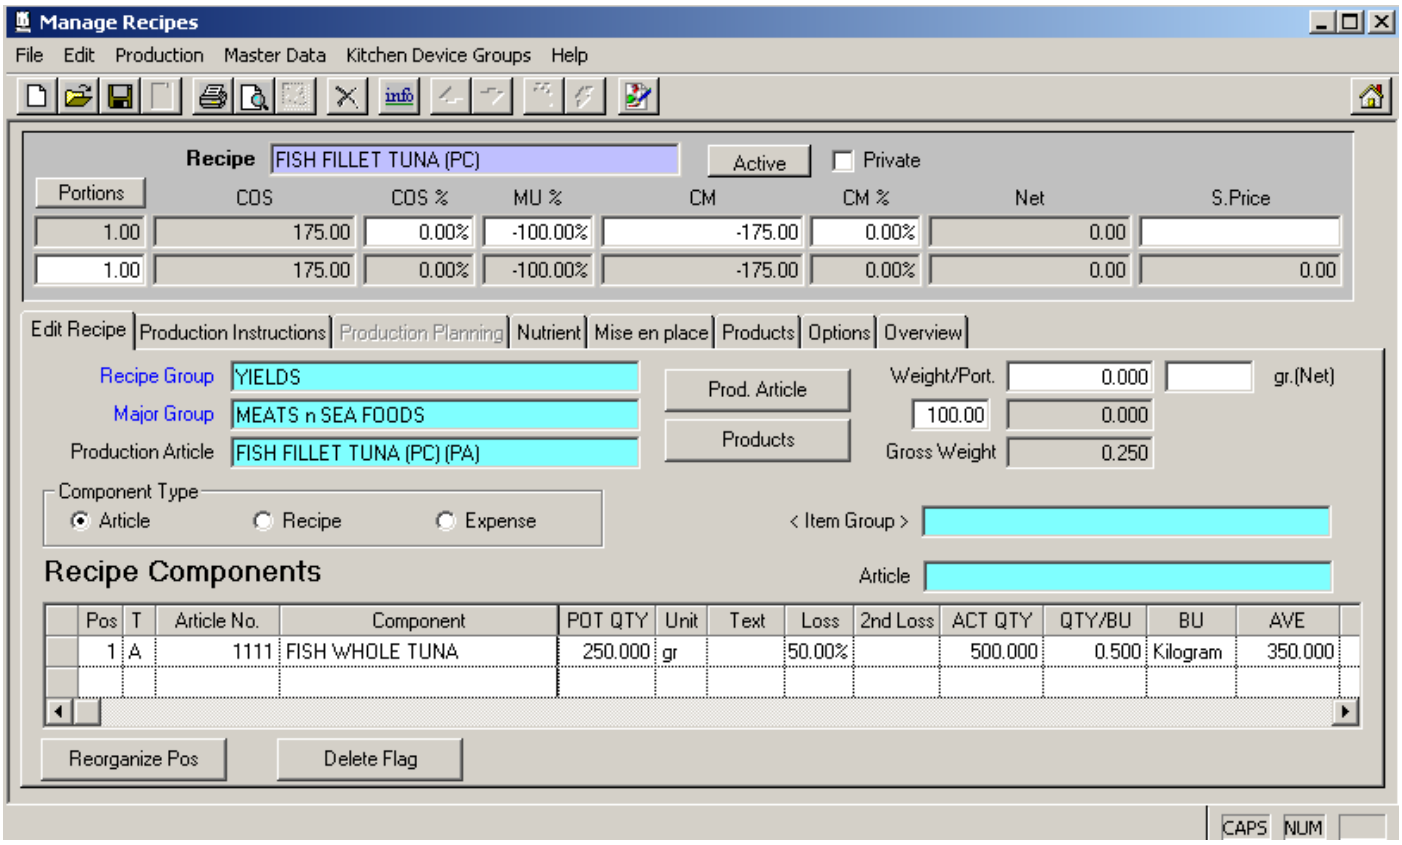

First, go to Masterdata > Cost Centre/ Store and set up the store to enable production on transfer:

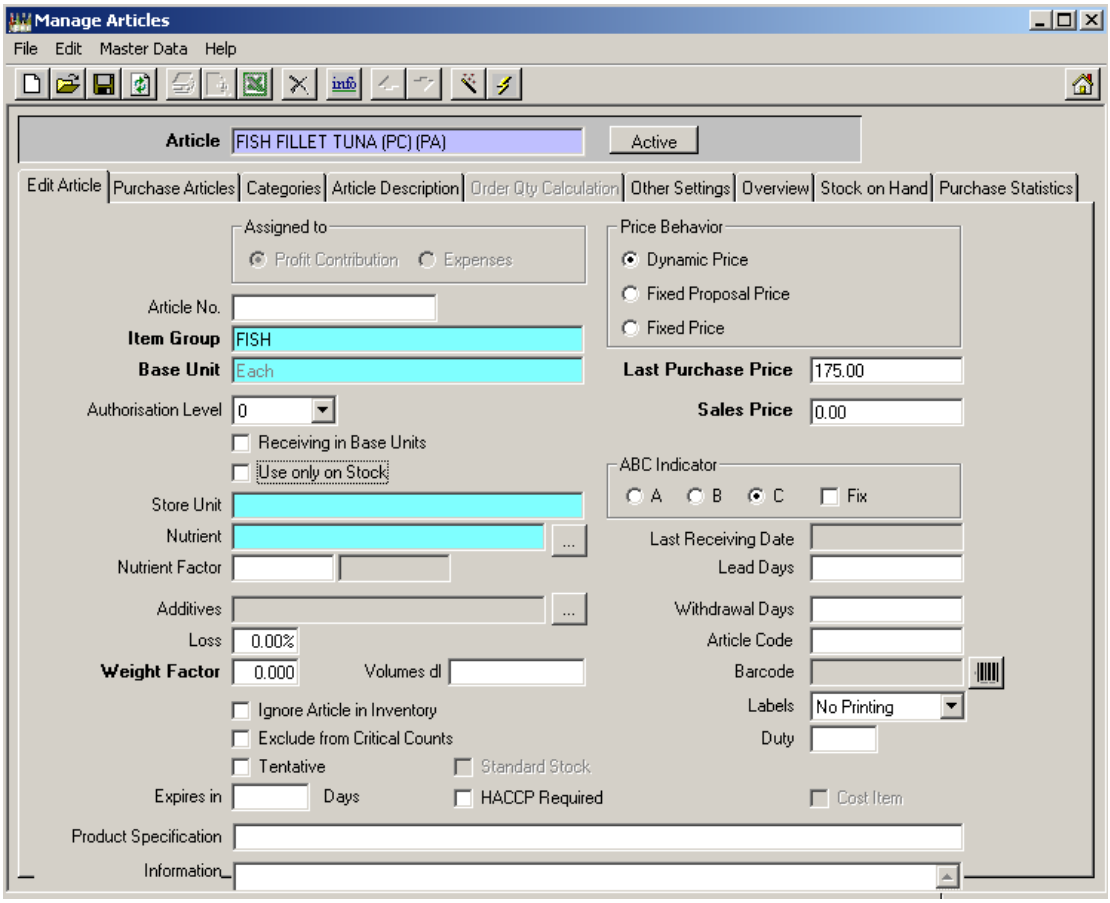

Then create the article to be purchased from the supplier.
Go to Masterdata > Articles and create the article

Then go to Production > Recipes & create a Production Article:

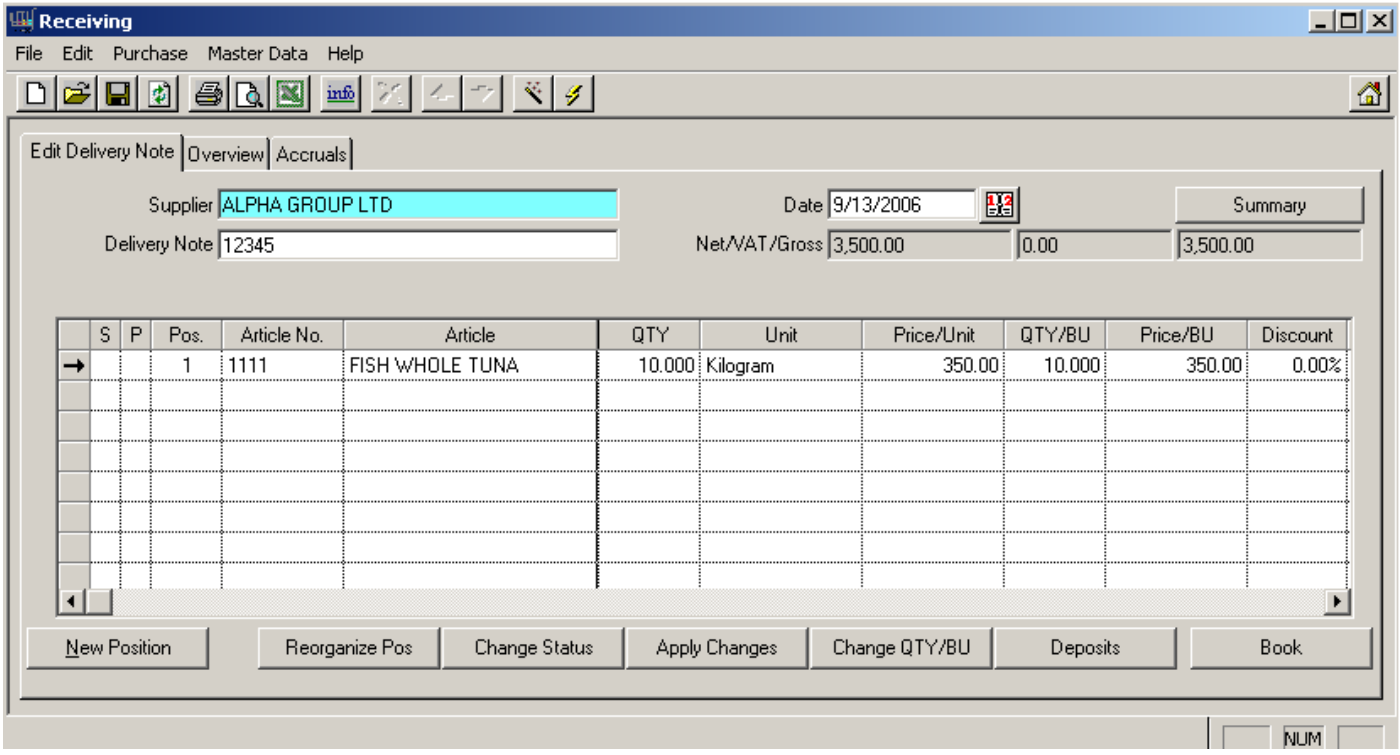

Third go to Masterdata > Article and select the production article and disable the setting "Use Only on Stock" & Save

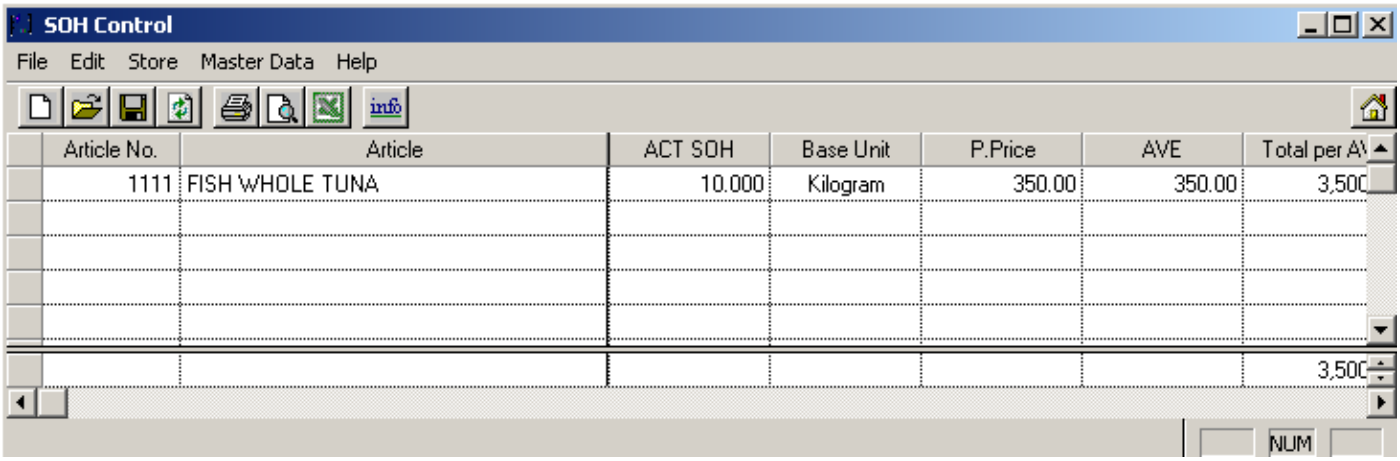

Using the Production Article

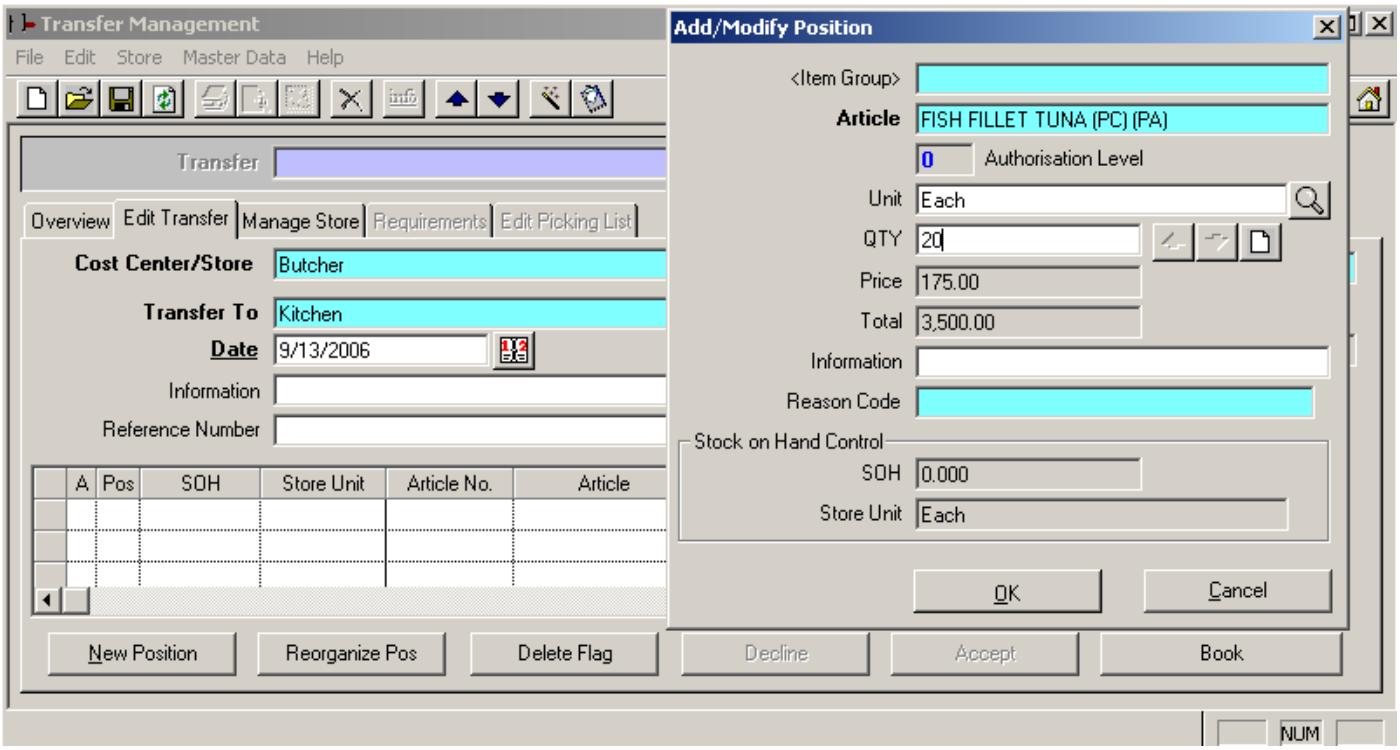

Purchase the item (**NOT THE PRODUCTION ARTICLE!!!**):

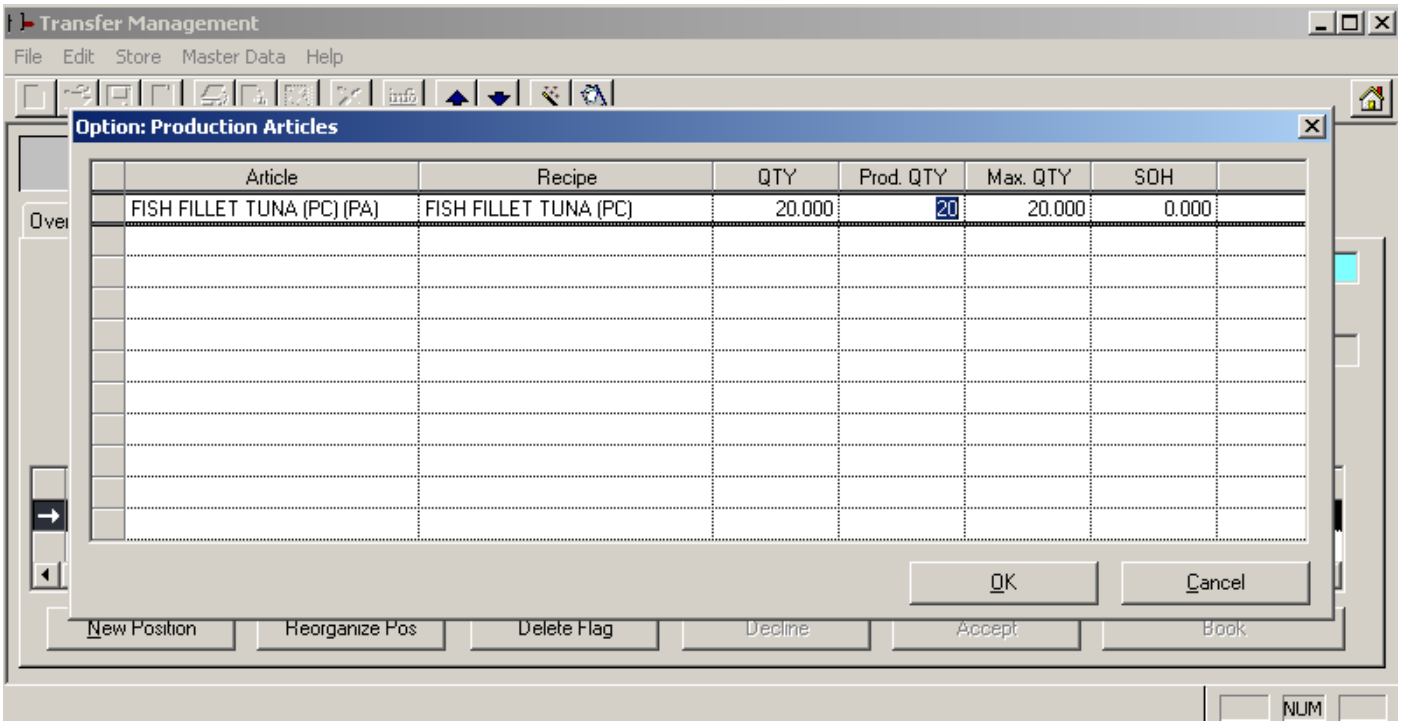

After the purchase check on the Stock on Hand

Then do a transfer of the processed article to any other location:

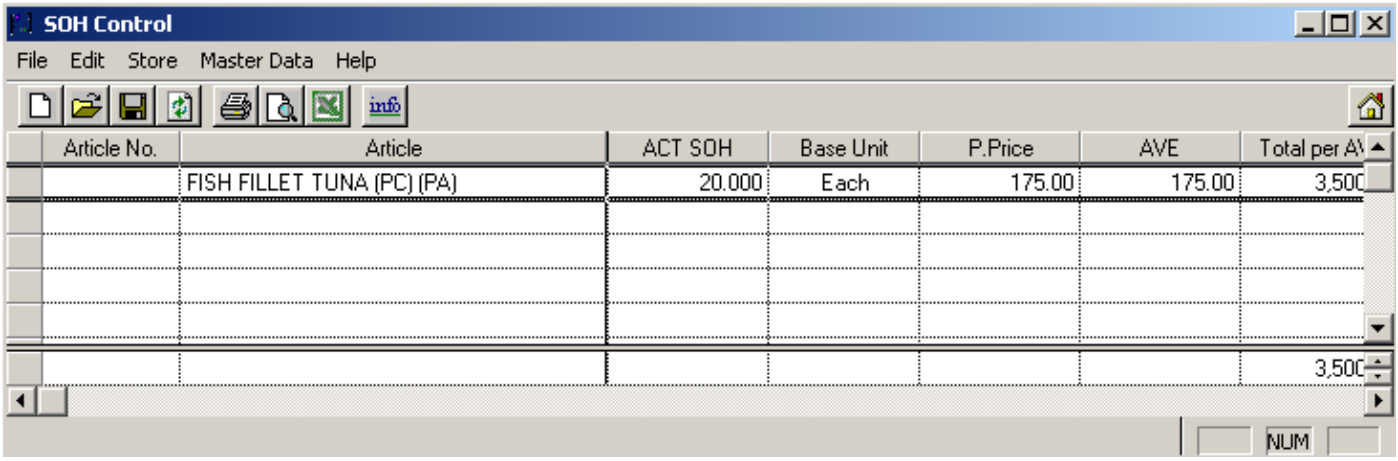

When Booking the Transfer, the following screen appears:

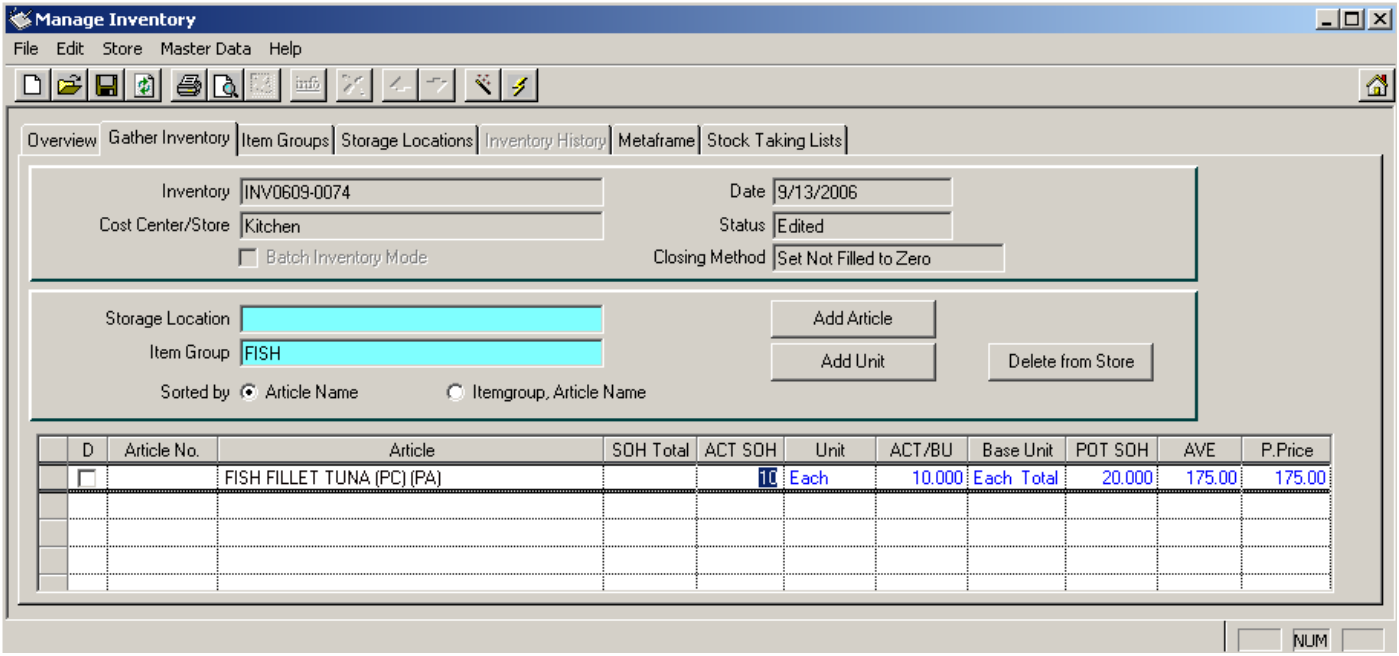

Click OK on this window.

If you check on the Stock on Hand in the destination location it will be as follows:

When doing a stock take of the destination location the production article will appear as a normal item:
