Materials Control Procedures for Usages.

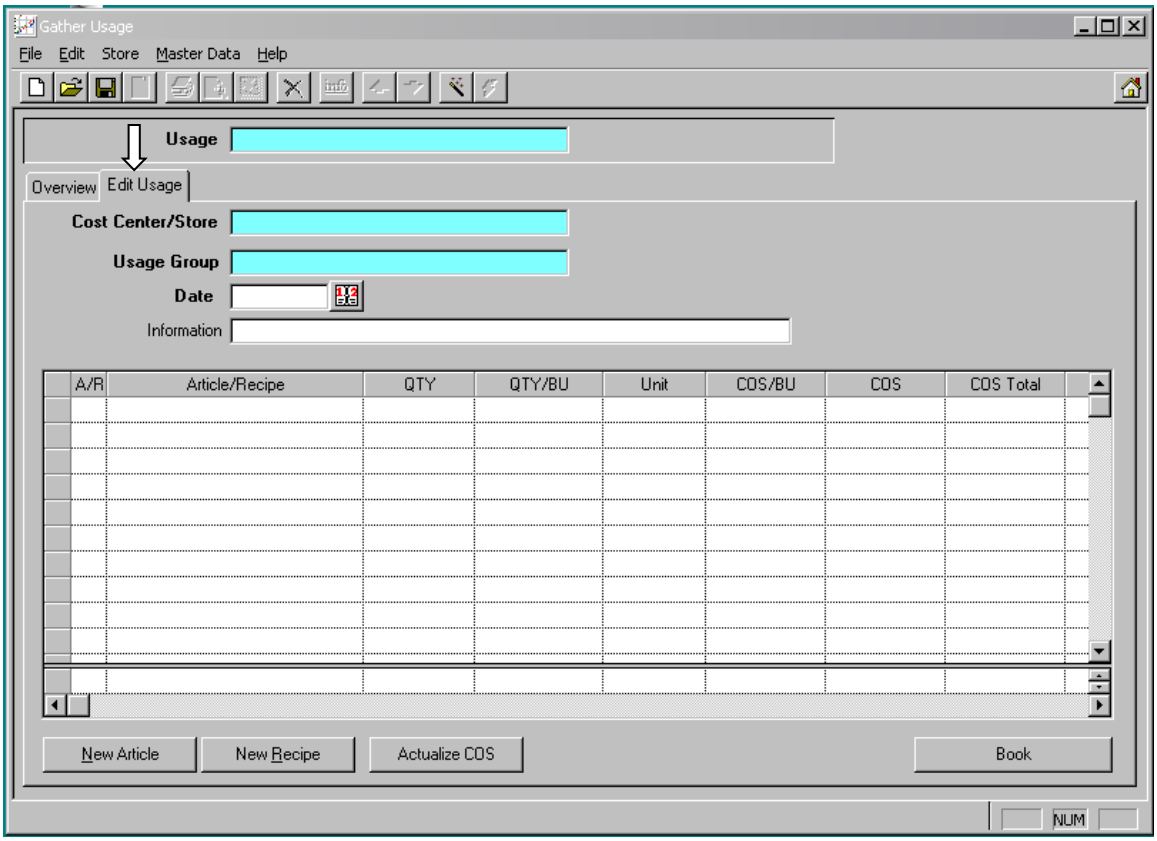

Usages

Usages are pre-defined accounts in the System used to post transactions that involve the reduction of stock from a store or outlet. E.g. Officers & Entertainment Items, Director's accounts, Wastages & Spillages etc.

→ Click on the '**Store**' tool bar menu, at the top
Scroll down to '**Usage**'
Click on '**Gather Usage**'

→ The following window will appear:

→ Click on the '**Edit Usage**' Tab (*as is shown by the white arrow* ⇩ *)*

→ On this window please ensure the following:

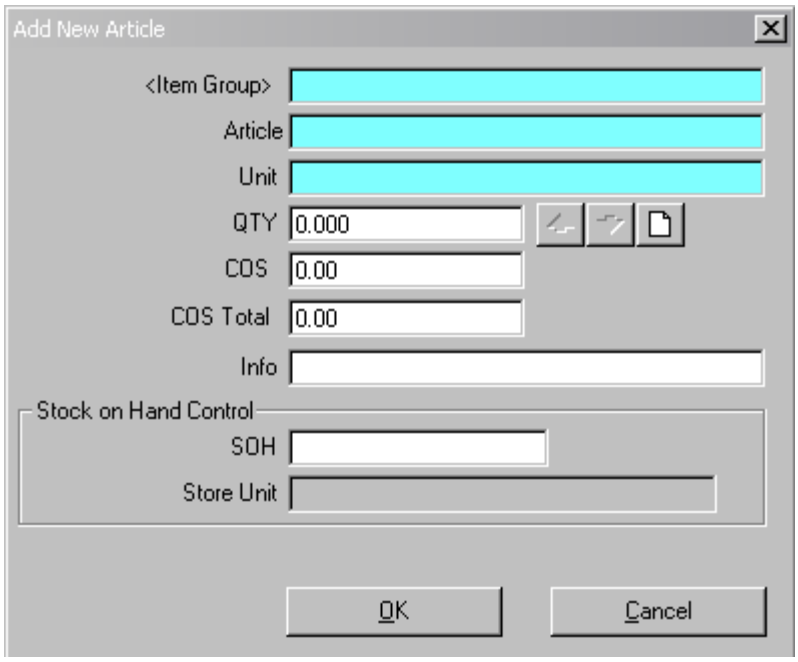

Select the correct Cost Centre/ Store from where the goods are to be accounted (reduced) from

Select the respective Usage Group that is to be accounted for the goods/ articles used

Enter the correct date of the transaction

→ Click on '**New Article**'

The following window appears:

Select the article which is to be posted to the account, it's APPROPRIATE UNIT and quantity.
The COS and COS Total fields in the window are automatically filled when you select an article. This shows the nett cost of the article chosen.

Click '<u>O</u>k'

→ Follow the above procedure to post all the articles for the particular Usage Group (account).
If articles are to be posted to a different Usage Group (Account), please 'Book' the current one and start the process again selecting a different Usage Group.

Once finished click on '**Ok**' and then '**<u>C</u>ancel'**

→ On the next window click on '**<u>B</u>ook**'.
A document reflecting the above transaction and it's nett cost is printed.

Please Note: The usages posted for a particular date are used in the Food/ Beverage Cost Calculation for that day.
For any day, the Usages are deducted from the total transfers made to the Main Kitchen / Outlets to arrive at the amount that was actually used to yield the sales (Cost of Sale).
The Sales made that day divided by this Cost of Sale is used to arrive at the Food/ Beveraege Cost Percent %.
