Materials Control Procedures for Inserting Daily Outlet Stock Take.

The following procedures are for inserting stock quantities for outlets.

Please note that this has to be done after the ALL the previous day's transactions are completed and the sales from Micros POS System have been imported.

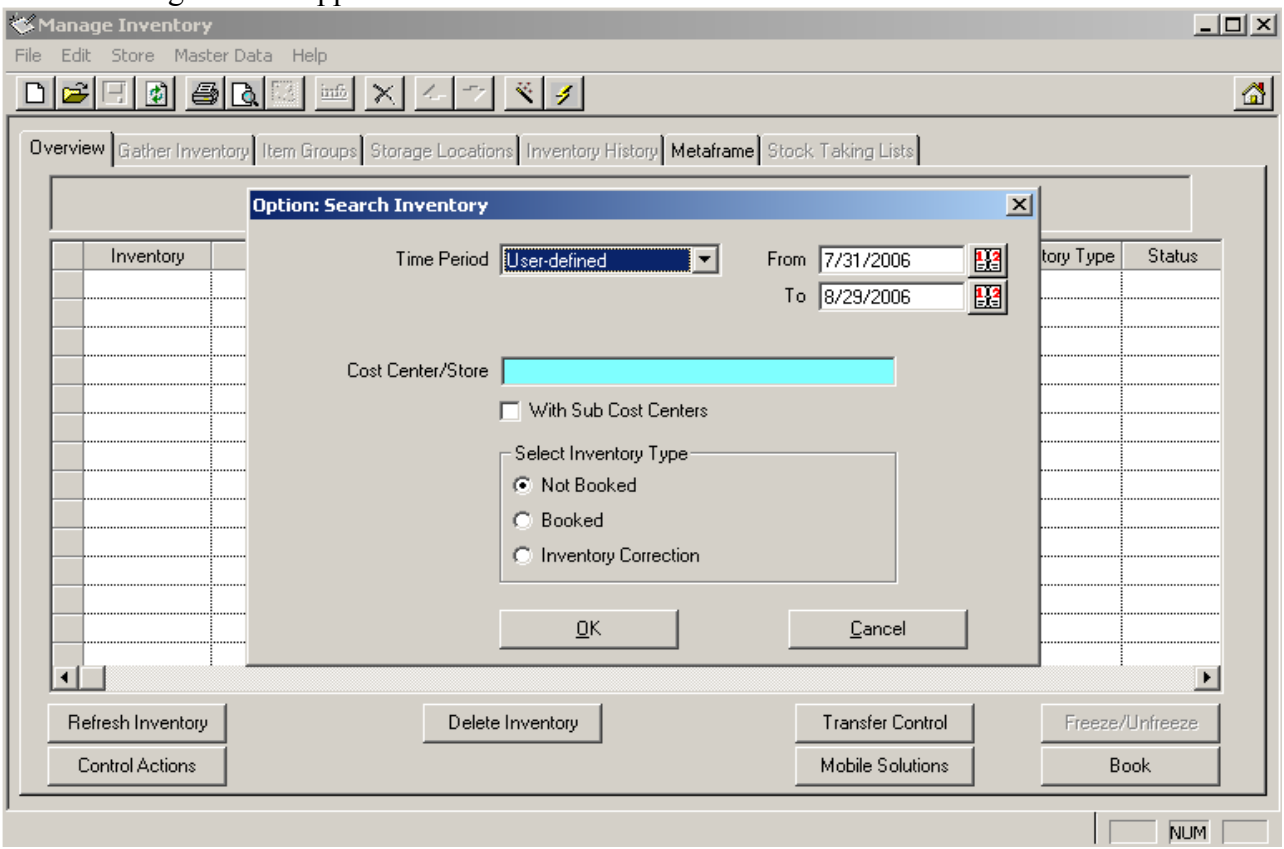

The following procedures are followed in sequence:

- Create an Inventory for each outlet
- Print Stock Sheets for each outlet
- Enter the physical/ actual stock quantities for all outlets
- Book all inventories for all outlets
- Print Variance report
- Print Outlet Summary Report
