Materials Control Procedures for Inserting and Using Par Stocks.

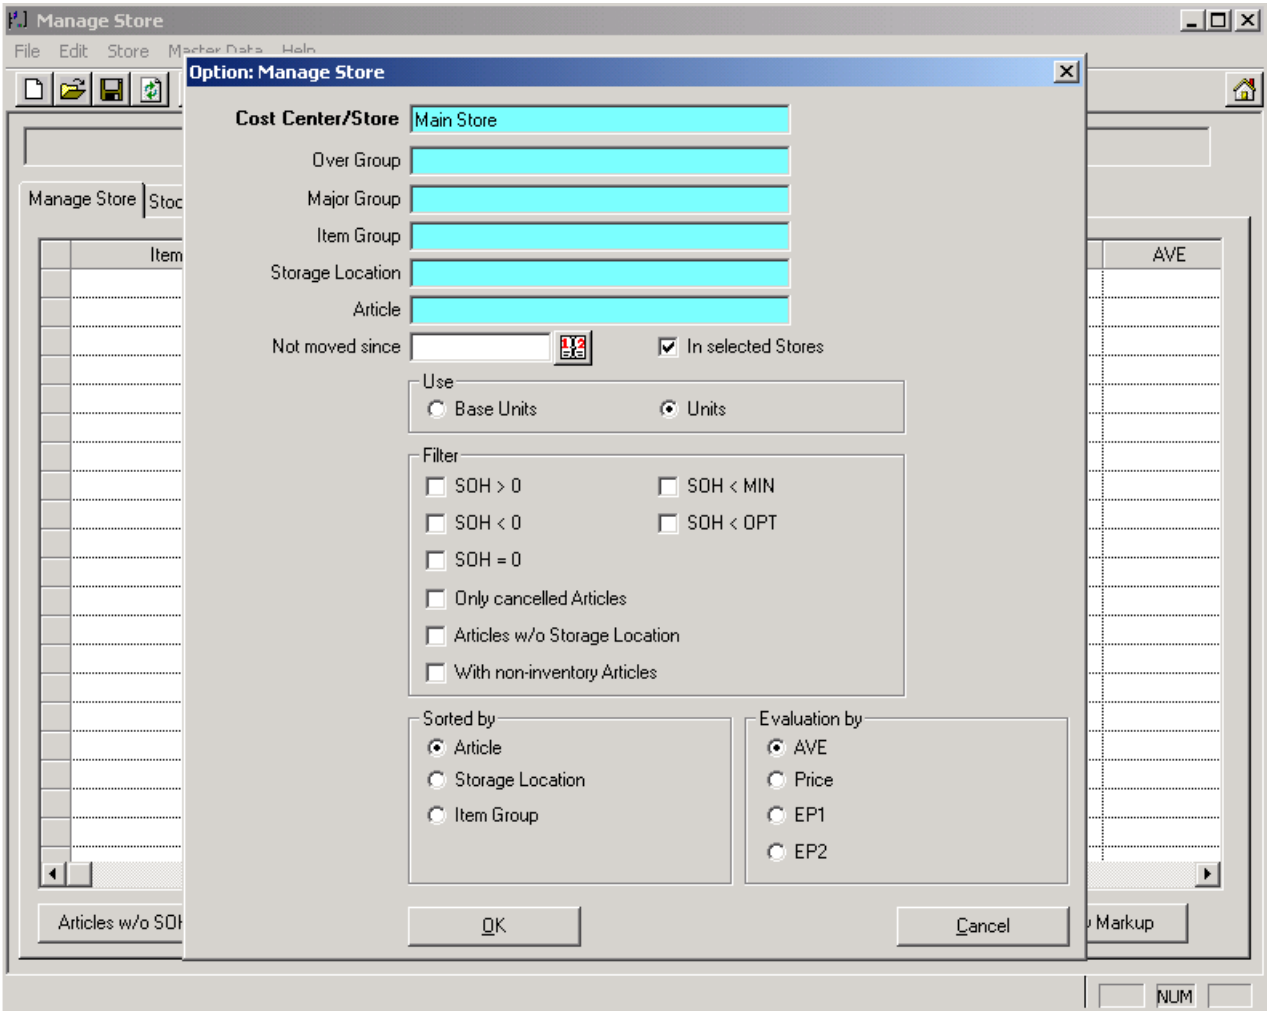

This document is meant to give procedures for inserting par stocks for each store/ outlet.
These par stocks will then be used to place Issue Requests from Main Stores and for Main Stores to place Purchase Requests.

Inserting Par Stocks.

Click on the Manage Store icon 

, under the Store short-cut bar.

The following window appears:

On this window, insert the following:

Cost Centre/ Store : Enter the Cost Centre/ Store/ Outlet for which you would like to set par stocks.

Over Group :
Major Group :
Item Group :
Storage Location :
Article :

These are optional fields to filter the group of articles e.g. Beers, Sodas, Beef Products etc.

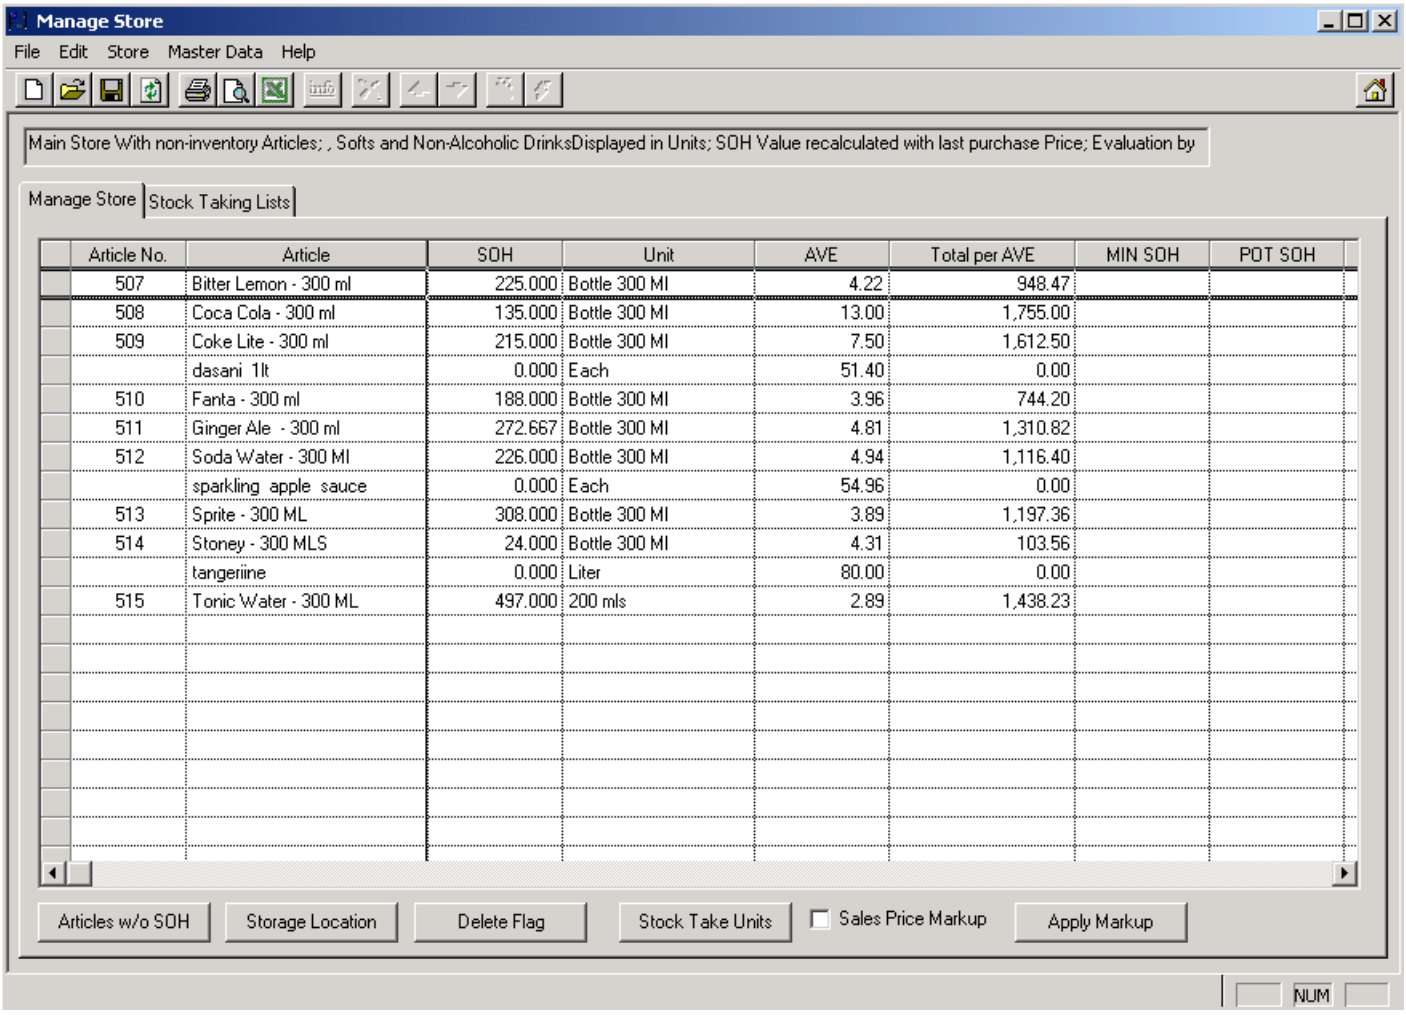

To apply a filter, Press Enter and select from the list.

On the following section, select **Units** :

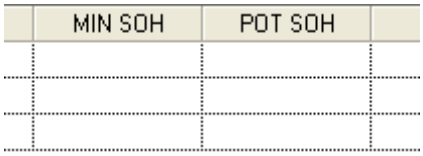

Click **OK**

The following window appears:

Select an item and click the cursor on the MIN SOH and POT SOH column to set the par stock levels:

Note the following:

- **MIN SOH = The Minimum inventory that should be held in the store/ outlet**
- **POT SOH = The target inventory that should ideally be held**
- **If you selected 'Base Unit' on the following section :**

Then you have to convert the par stock quantities to the equivalent of the Base Unit:

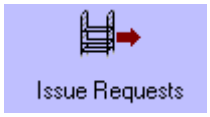

e.g. ***Units*** **>** ***Egg (Crate)*** **=** ***2*** *(Crates)……store unit is crate*

Base Unit **>** ***Egg (Crate)*** **=** ***60*** *(Each)…… base unit is each*

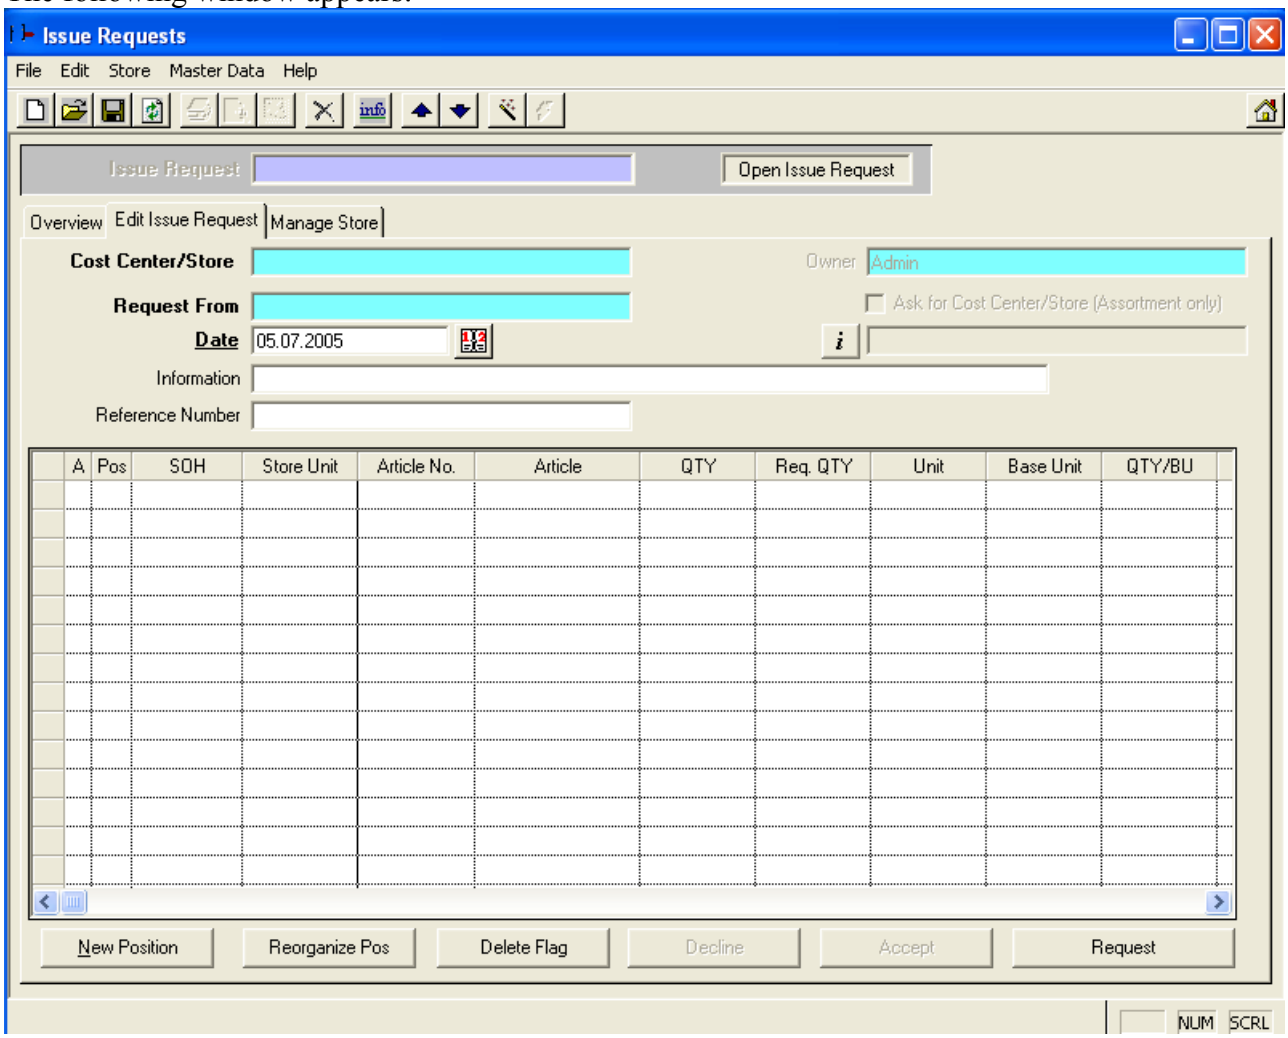

When all the par stocks of the articles have been set then click on the '**Save**' Icon 

PLEASE REPEAT THE ABOVE PROCEDURE TO SET PAR STOCKS FOR ALL STORES/ OUTLETS.

Placing an Issue Request Based on current stock on hand and Par Stocks.

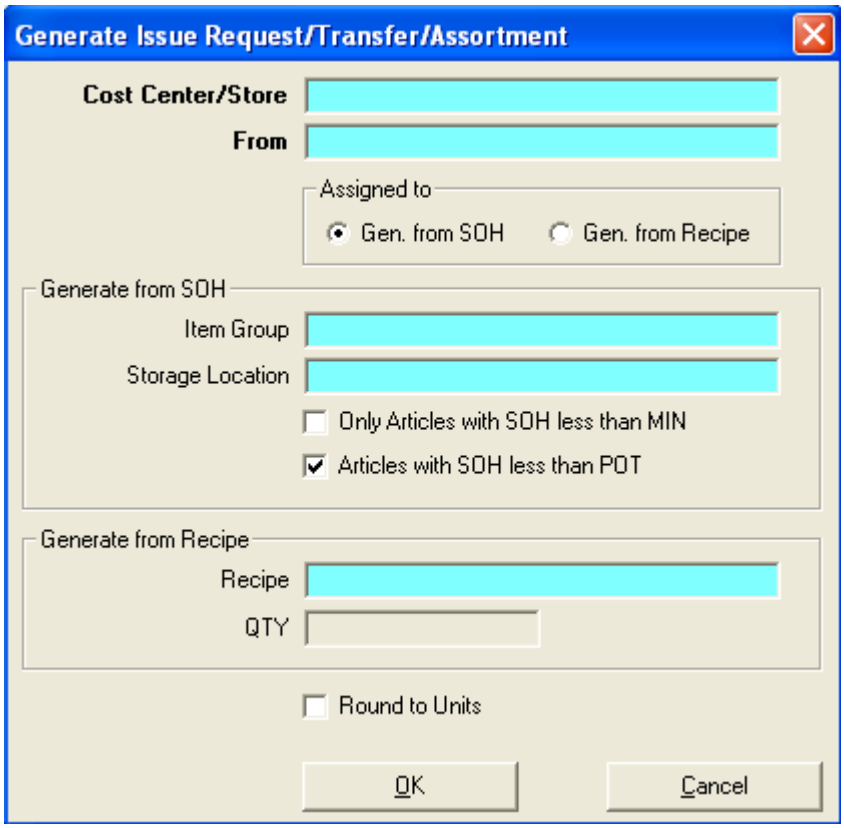

Click on the Issue Request icon 

The following window appears:

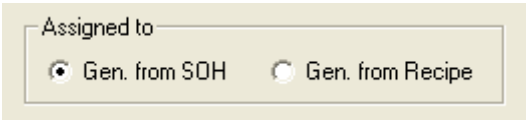

On this window click on the *'magic wand'* icon  (*this is found under the top menu bar*)

The following window appears:

On this window:

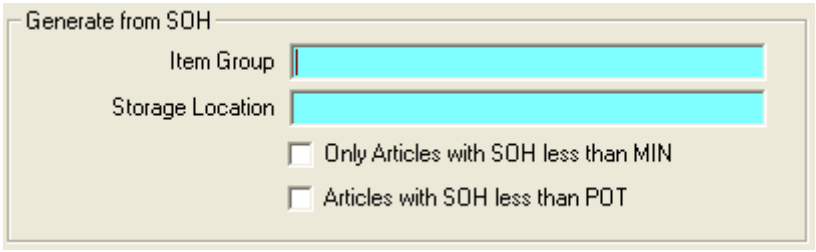

Cost Centre/ Store : The store/ outlet that is placing this request
From : The store that is going to issue out these goods

Gen. from SOH = *Select this if you want to base your requirements on current stock on hand you have and the stocks that are meant to be held (i.e. set as par level)*

Gen. from Recipe = *Select this if you want to base your requirement on the quantities of ingredients defined in a recipe.*

If you selected Gen. from SOH, from above then refer to the following section:

Item Group :
Storage Location :

These are optional fields to filter the group of articles e.g. Beers, Sodas, Beef Products etc.

To apply a filter, Press Enter and select from the list.

: Tick this check box if you want your issue request to be only those items that have stock quantities below the MIN SOH par level set.

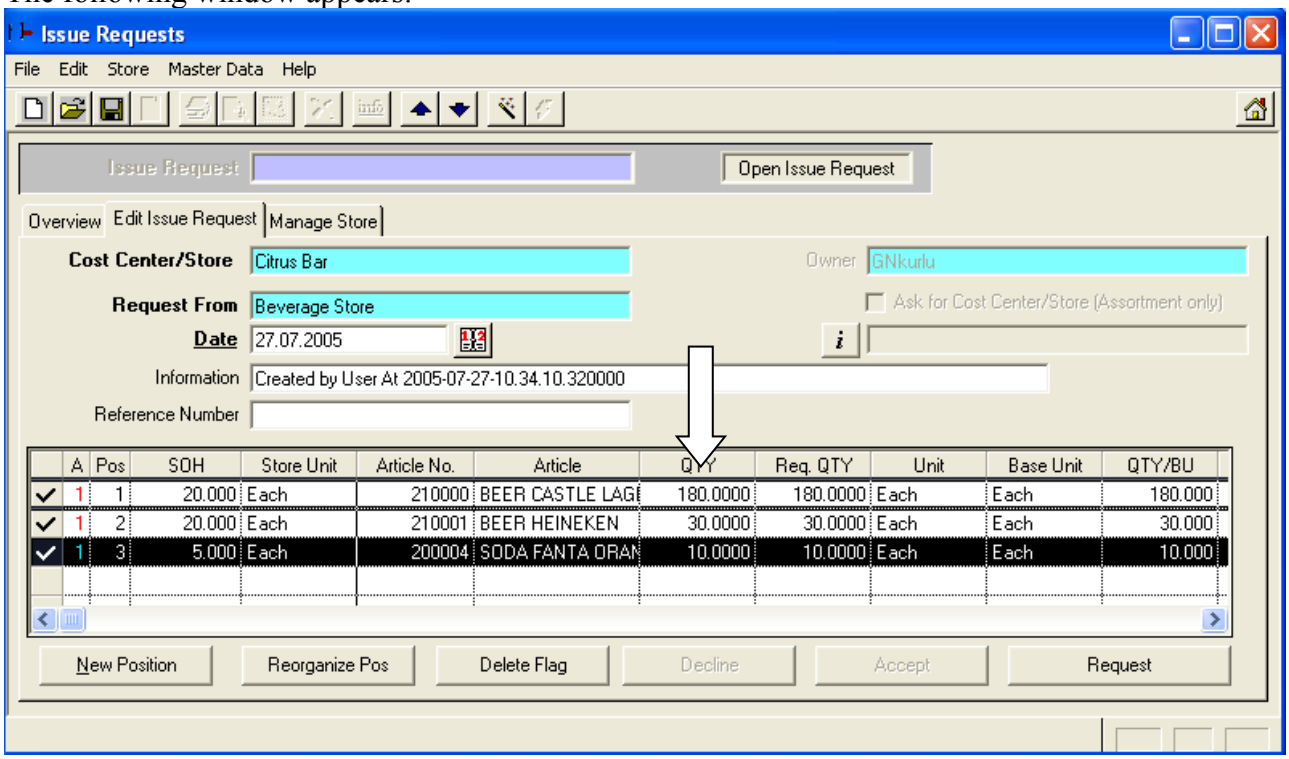

: Tick this check box if you want to replenish all the articles upto their POT SOH par level set.

NB : In both cases the quantity requested will be the difference from the POT SOH par level set.

Click **OK**

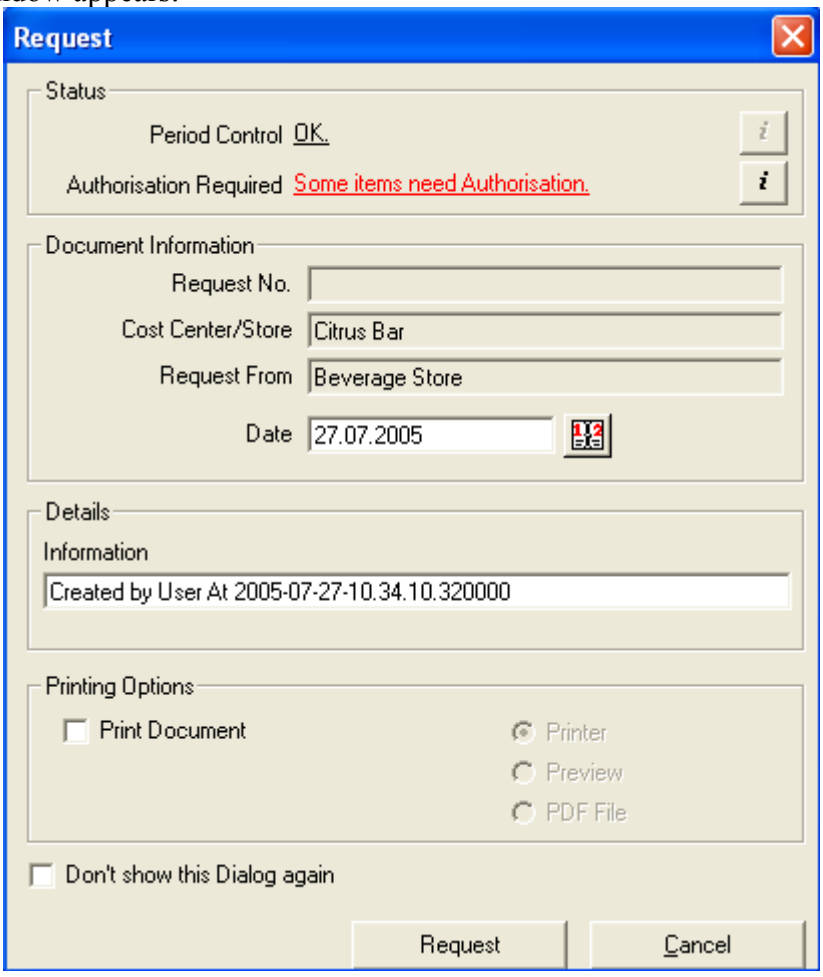

The following window appears:

This window proposes to you the quantity to request for from the Main Store so as to replenish stock upto the POT SOH set for this outlet. However you can change the quantity you want to request by simply changing the quantity in the QTY column as shown by the White Arrow above.

After this simply click on ‘Request’ 

The following window appears:

Click on ‘Request’ 

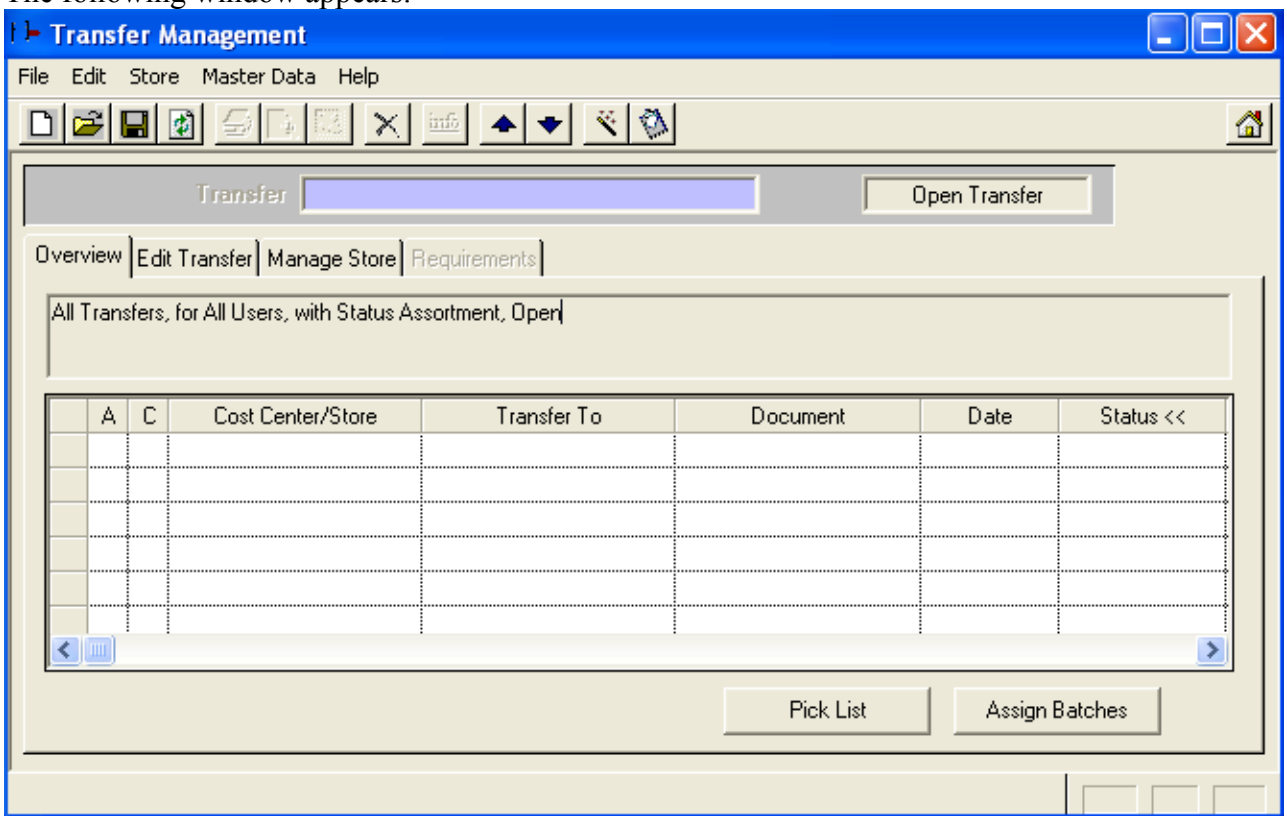

AFTER THIS STAGE THE ISSUE REQUEST FOLLOWS THE NORMAL PROCESS OF BEING AUTHORIZED AND THEN BEING PICKED UP BY THE STORES’ CLERKS (*from the Transfers Icon*) WHO WILL THEN BOOK IT AS HAVING PHYSICALLY ISSUED OUT THE GOODS.

Placing an Purchase Request Based on current stock on hand and Par Stocks.

Please note that this is meant to be done for Main Stores only.

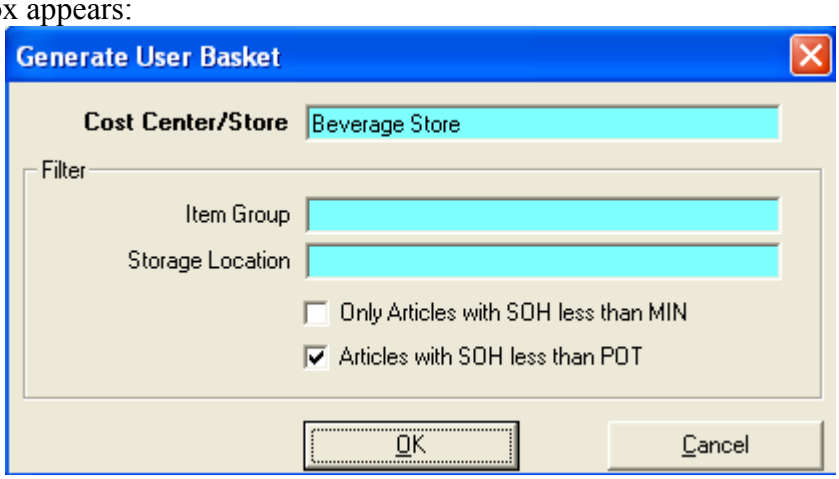

Click on the '**Transfers**' icon 

The following window appears:

On this window click on the '*Clip Board*' icon 

The following box appears:

Cost Centre/ Store : The Main Store that wants to generate the articles it requires

Item Group :
Storage Location :

These are optional fields to filter the group of articles e.g. Beers, Sodas, Beef Products etc.

To apply a filter, Press Enter and select from the list.

: Tick this check box if you want to replenish only those articles whose stock quantities below the MIN SOH par level set.

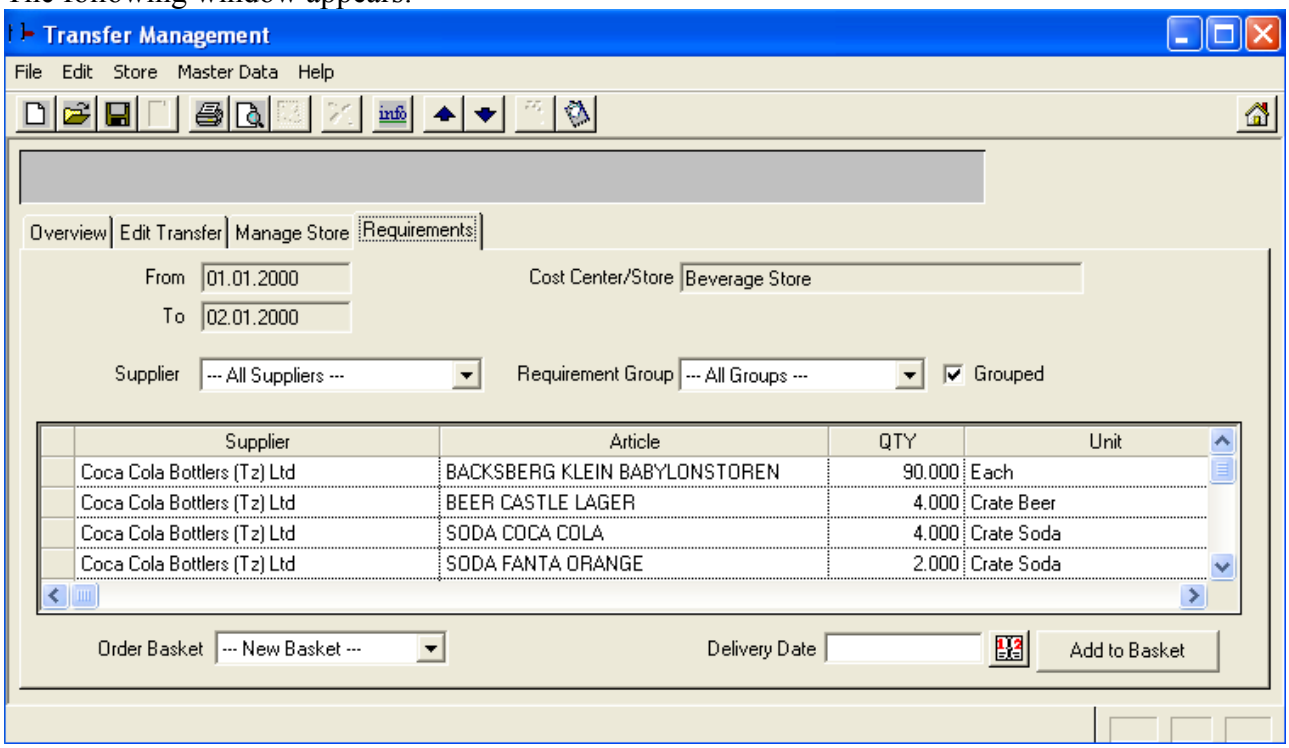

: Tick this check box if you want to replenish all the articles upto their POT SOH par level set.

NB : In both cases the quantity requested will be the difference from the POT SOH par level set.

Click **OK**

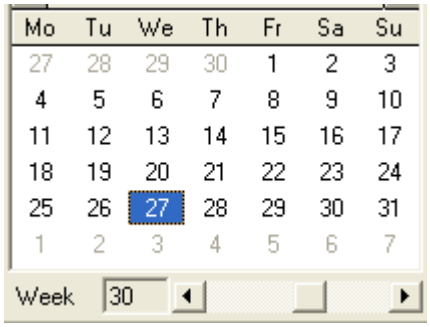

The following window appears:

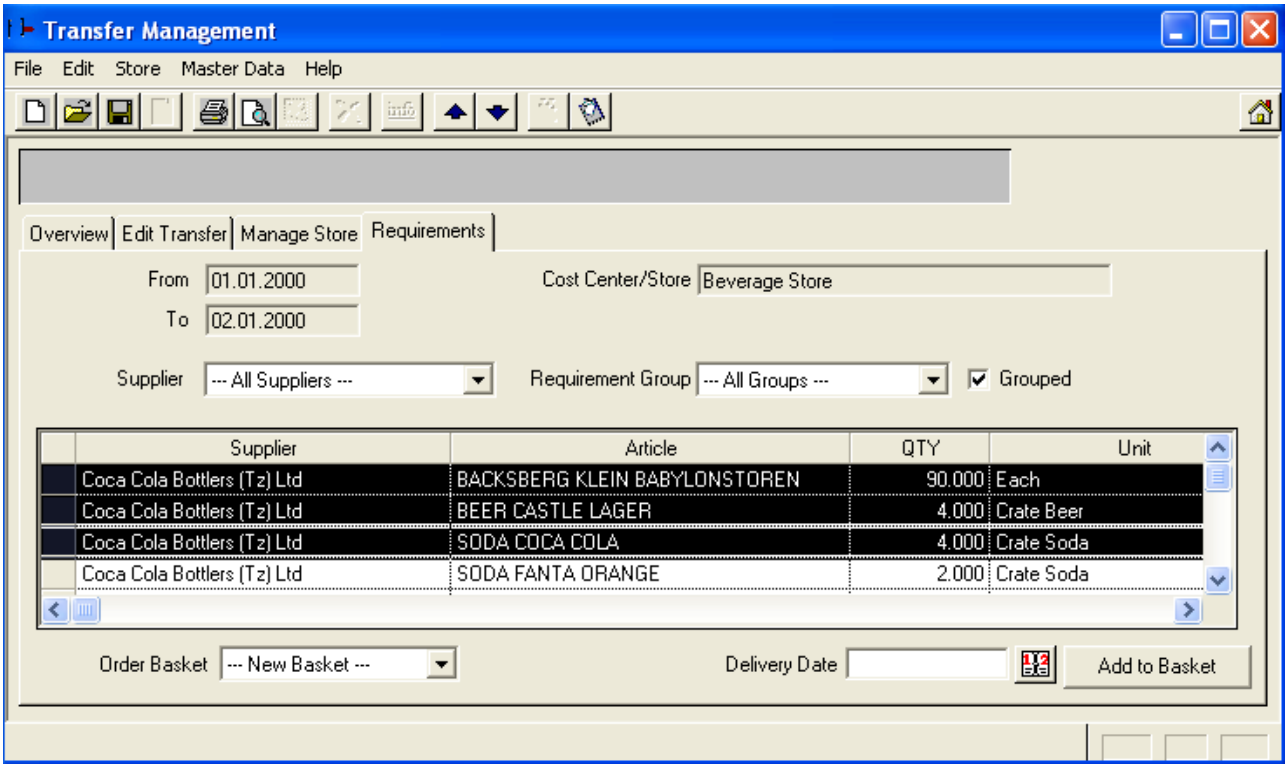

On this window:

- First, click on the Calendar Icon 

and double-click on the proposed delivery date when these items are needed.

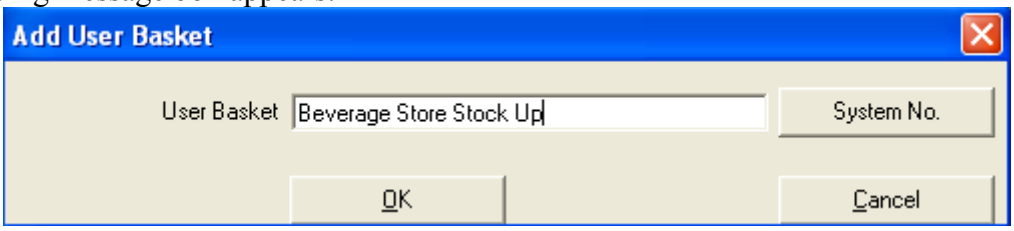

- Secondly, **Highlight** the place an order request for, as 

articles that you want to below:

- Thirdly, Click on '**Add to Basket**' 

The following message box appears:

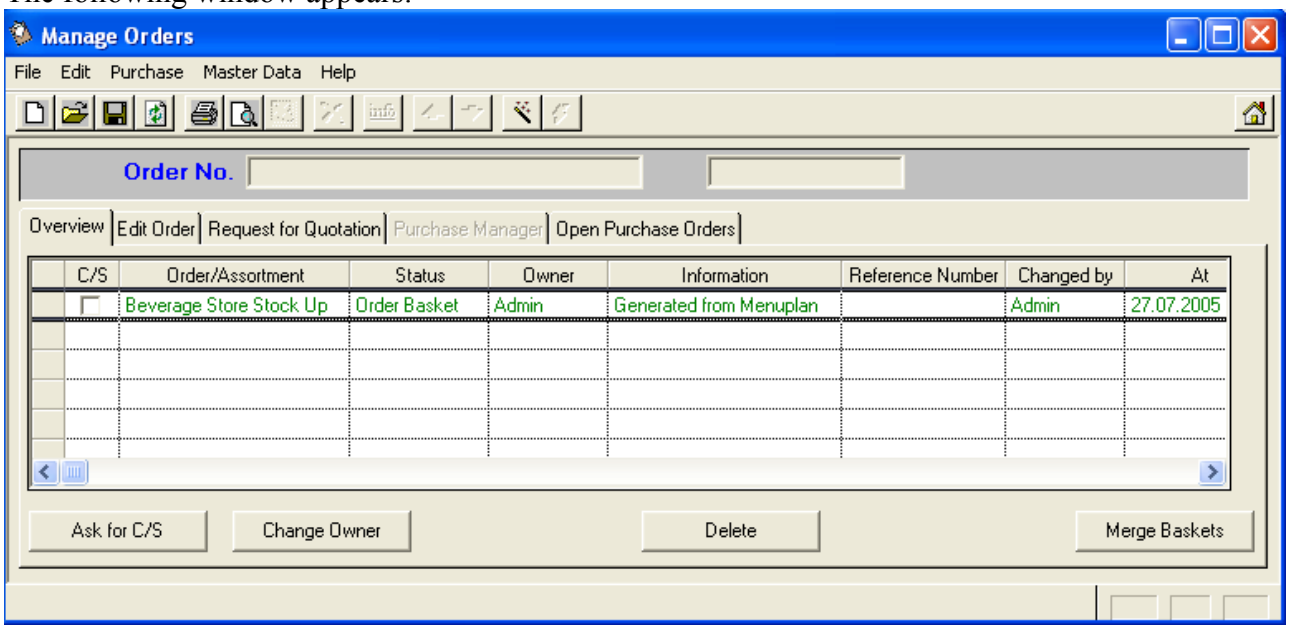

Type any information to identify this Purchase Request and then click **OK**.

AFTER THIS STAGE, THE PURCHASE OFFICER OF YOUR ORGANIZATION WILL PICK IT UP WHEN THEY ACCESS THE PURCHASE ICON.

Making an LPO from a Purchase Request made through the Par Stock method of stocking up (*from above*).

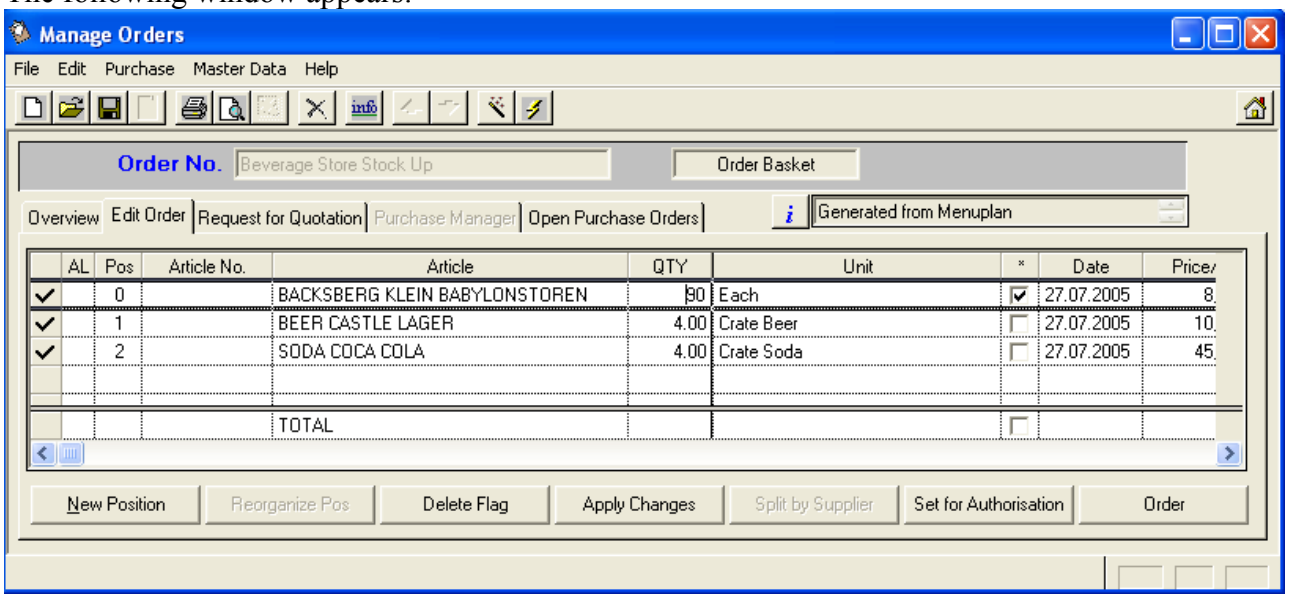

Click on the '**Purchase Orders**' Icon 

The following window appears:

On this identify the purchase request from the name given to it, *e.g. Beverage Store Stock Up*

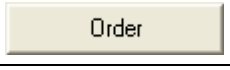

Double-click on it.
The following window appears:

On this window, change the quantity in the '**QTY**' column and purchase prices in the '**Price/Unit**' column if need be.

To change suppliers, delivery date or store click on the'**Apply Changes**' button 

Lastly, if authorisation is required then click on '**Set for Authorisation**' 

Or else simply click on '**Order**' 

to generate an LPO.
