Materials Control Procedures for Inventory Stock Take.

Monthly stock take procedure in Materials control is available on the stores module. This procedure should be carried out every last day of the month. It's the Responsibility of the Hotel to ensure that the Physical stock is entered into the system on or before the last day of the month as the inventory date can not be backdated.

The inventory should be closed before the beginning of the next month

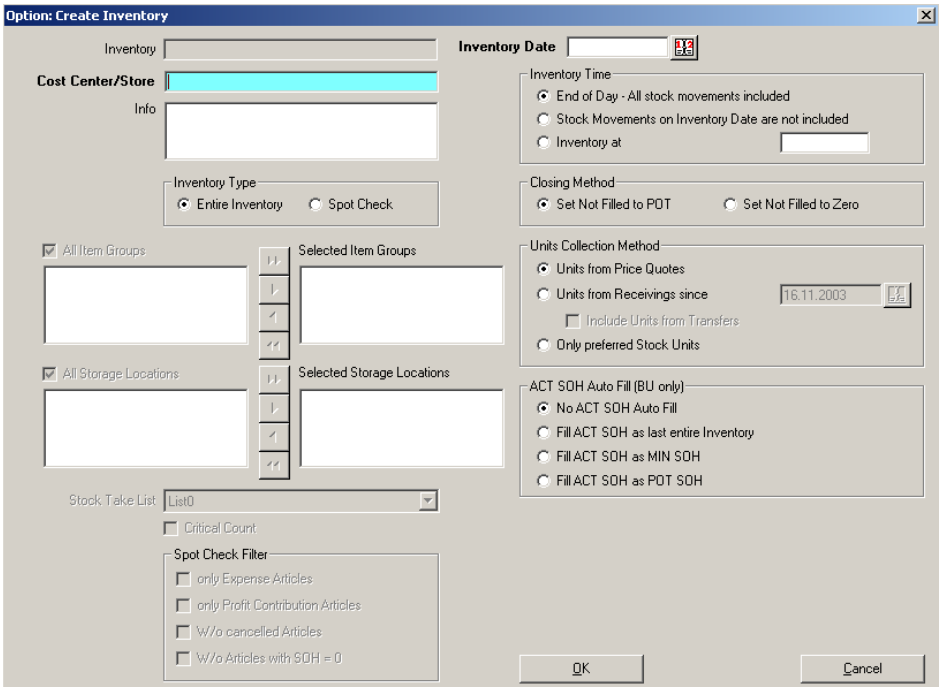

1. The first step is to create an inventory for the store one want to take stock on. To carry out this.

    - Double clicking on the inventory module, cancel the screen shown below.

Novacom Systems Ltd
ME Bank Tower
6th Floor, Milimani Road
P. O. Box 49076,
Nairobi, Kenya
Phone: +254 2 271-4088
Fax: +254 2 271-5461
Email: info@novacom.co.ke

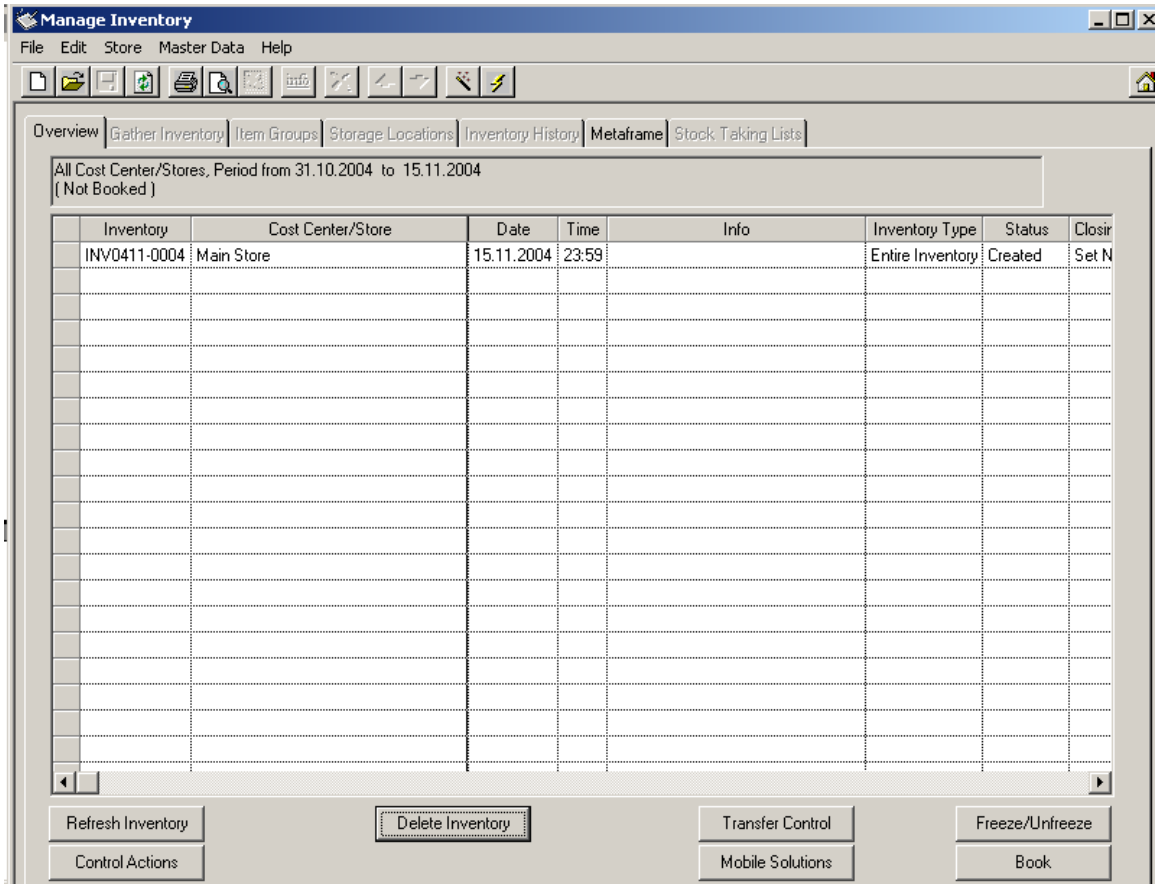

- Click on the  (new) icon on the inventory module to create new inventory

- Select the Store you want to take stock on
- Specify the inventory date.
- For an end month stock take click on 'Entire Inventory' and for spot check click on 'spot check'. If you want the system to replace all the stock where physical stock is not taken with zero then click on. 'Set not filled to zero' otherwise select 'set not filled to POT'

Novacom Systems Ltd
ME Bank Tower
6th Floor, Milimani Road
P. O. Box 49076,
Nairobi, Kenya
Phone: +254 2 271-4088
Fax: +254 2 271-5461
Email: info@novacom.co.ke

- Click OK to create inventory. A new inventory will be created and the screen will appear as shown below that is using 'Main store' as an example.

2. The second step is to print stock take sheets.
   - Highlight on the created Inventory (example Main store above)
   - Click on the  (preview) icon to print the stock sheets to be used in the physical stock take. Select the 'stock take list 'report from the list and click OK. The report preview will be displayed.

- To print click on  (Print) icon on the preview report.

3. The third step is to take the actual physical stock take.

4. The forth step is to enter physical stock take into the computer system.

   - Double click on the created inventory. The following screen will be displayed. The screen shows the item groups of the stores selected.

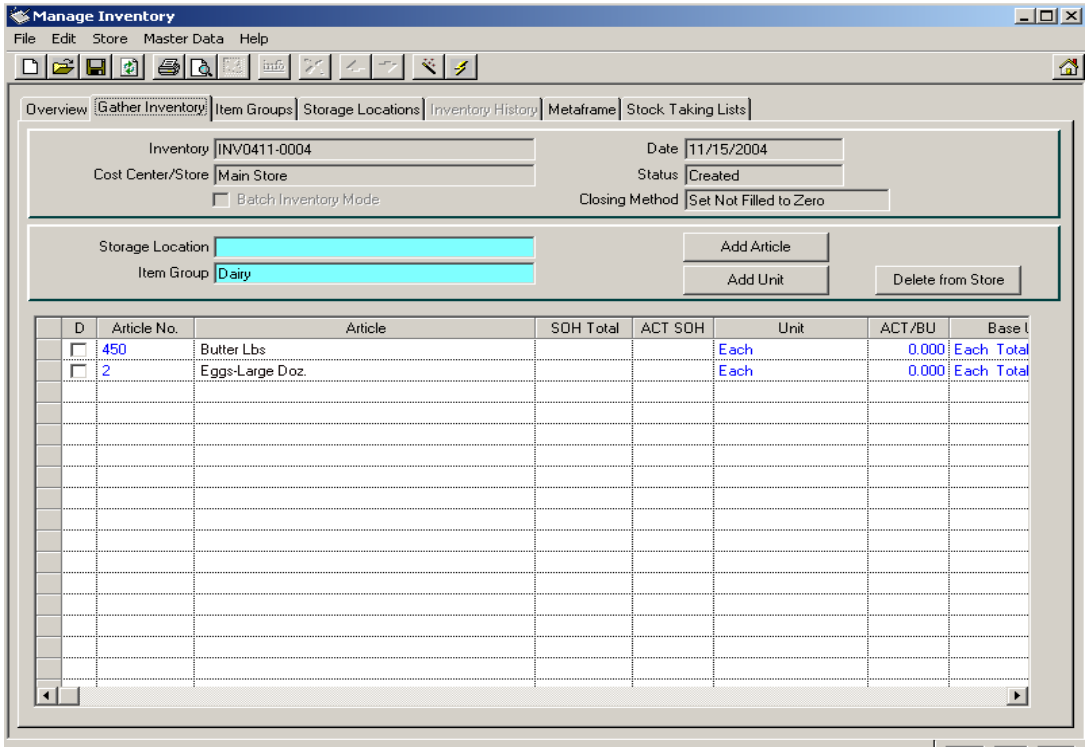

Item Group	ACT	POT	Deviation(AVE)	Edited
Dairy		113.60	-113.60	0.00%
French White		1,044.00	-1,044.00	0.00%
Fruit		533.00	-533.00	0.00%
Juices		89.90	-89.90	0.00%
Liqueurs		237.34	-237.34	0.00%
Other Dry Goods		48.99	-48.99	0.00%
Other White		919.03	-919.03	0.00%
Pastry		401.20	-401.20	0.00%
Softs		13.63	-13.63	0.00%
White Alcohol		1,261.68	-1,261.68	0.00%
	0.00	4,662.37	-4,662.37	0.00%

- After keying in all the items on that Item Group click on  (save) to save and proceed to the next Item group by clicking on 

icon.
- Repeat the process until all the Item groups have been covered.

5. The fifth step is to check on Variances.
   - Click on the  (preview) icon and this time select the report 'INVENTORY DEVIATION BY VALUE'. This report shows the difference between the actual stock take and the system stock. Print the report and resolve all the differences if necessary.
   - The following reasons cause the variances on the deviation report.
     i. Store issues not done using the system
     ii. Items not received in the system
     iii. Usages not processed in the system
     iv. True variances that can be justified.

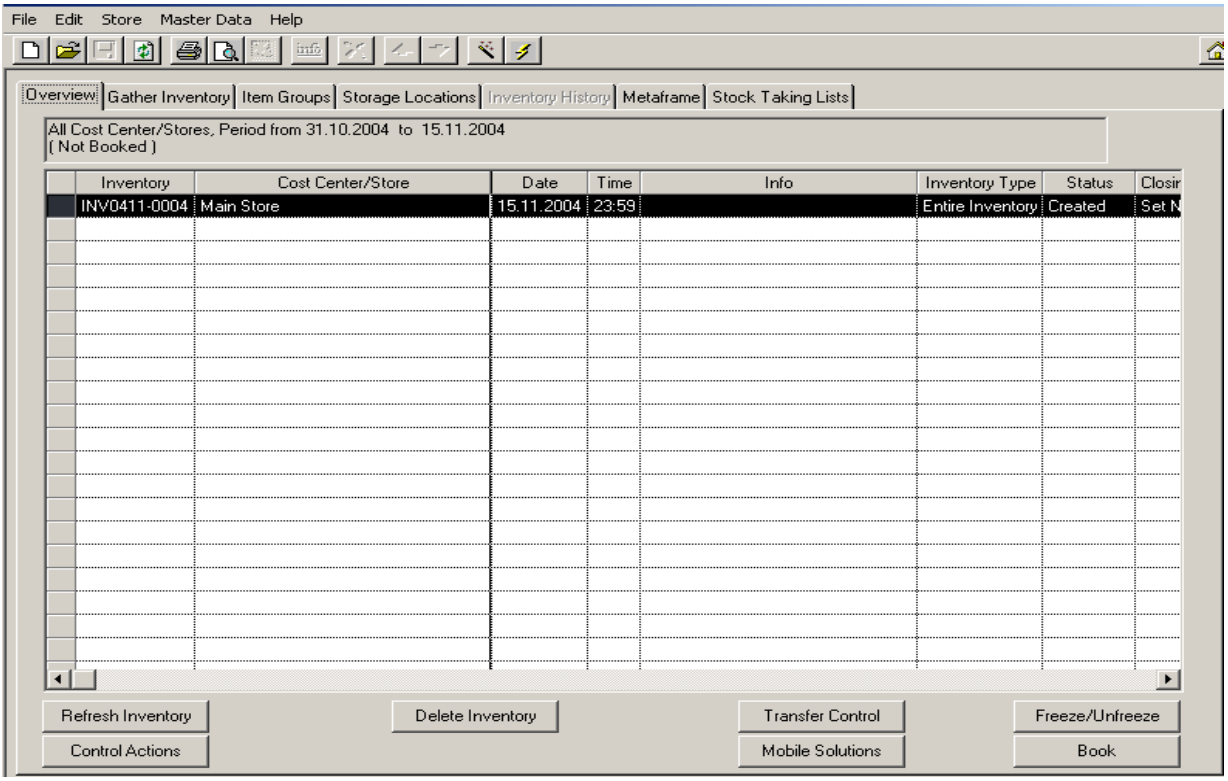

- To ensure all the changes are effected press on the Refresh Inventory Button. This will update changes made after the Inventory is created.

6. The sixth step is to close inventory. This mean the physical stock entered will be the opening stock for the next month. This will also be the stock on hand once the inventory is closed
