Users & User Rights

Administering Users and User Rights

This document is for creating users of the system and giving access rights

Access the Users function 

The following screen appears:

Login Name	:	Type the user's login name
User	:	Type the user's full names
Password	:	Type any password for the user
Department	:	Press Enter and select the user group to allocate this user to
Phone	:	Type the user's phone extension
Fax	:	Type the user's fax number
E-mail	:	Type the user's email address
Information	:	Type the user's job description
C/S Filter	:	Tick this box and then click on the Up-Arrow to select the stores to given this user access rights to.

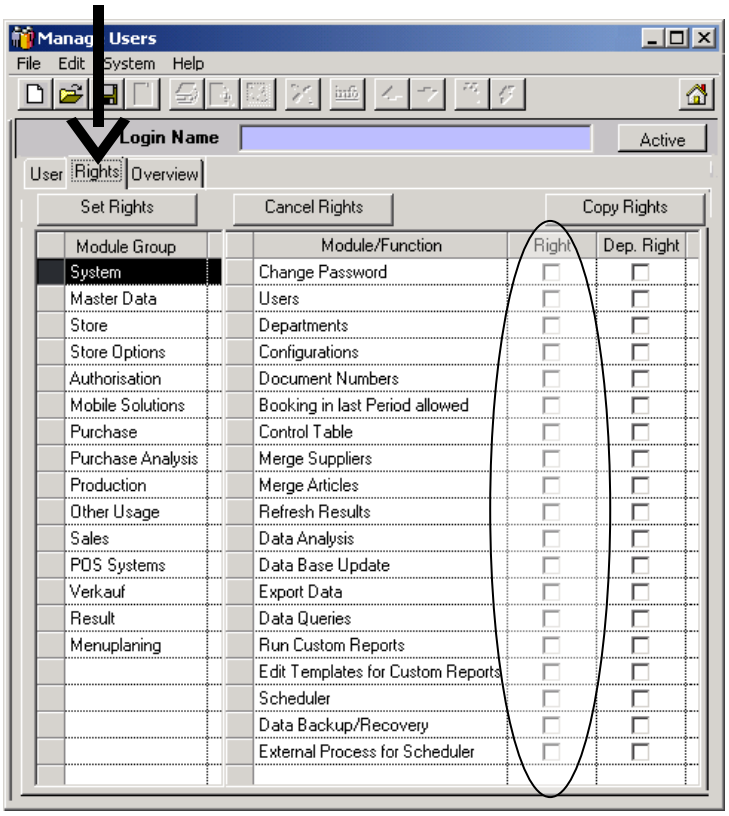

Authorization Level : If the user is an authoriser, give the user a level higher than the articles, if not give a lower authorization level.

Purchasing : If the user will be resolving other people's purchase requisitions then tick the check box "User is Central Purchase Manager"
If the user will only be raising requisitions then Press Enter in the "Purchase Manager" field and select the any user from the list who will be resolving this user's requisitions.

Orders/ Book Revenue : If this user should be able to see everyone else's requests then tick the box "All"
If this user should only see his user group's requests then select the box "Department"
If this user should only see his own document then don't tick any box at all.

Assigning Individual Rights

Click on the "Rights" tab (as shown by the arrow below)

Give the access rights to the user by ticking the check box beside the function described.
Here only individual access rights can be assigned, the ticks can only be applied in the column highlighted above.
User group rights will automatically be displayed in the other column.

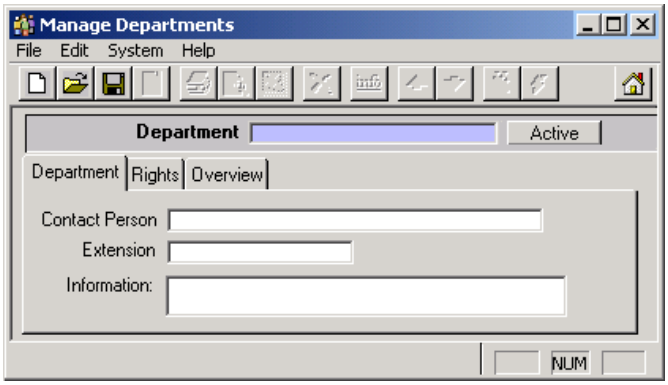

User group rights are assigned in a separate function.

Assigning User Group Rights

This is to assign rights on a user group level and then simply attach users to these groups.

Click the **"Departments"** icon 

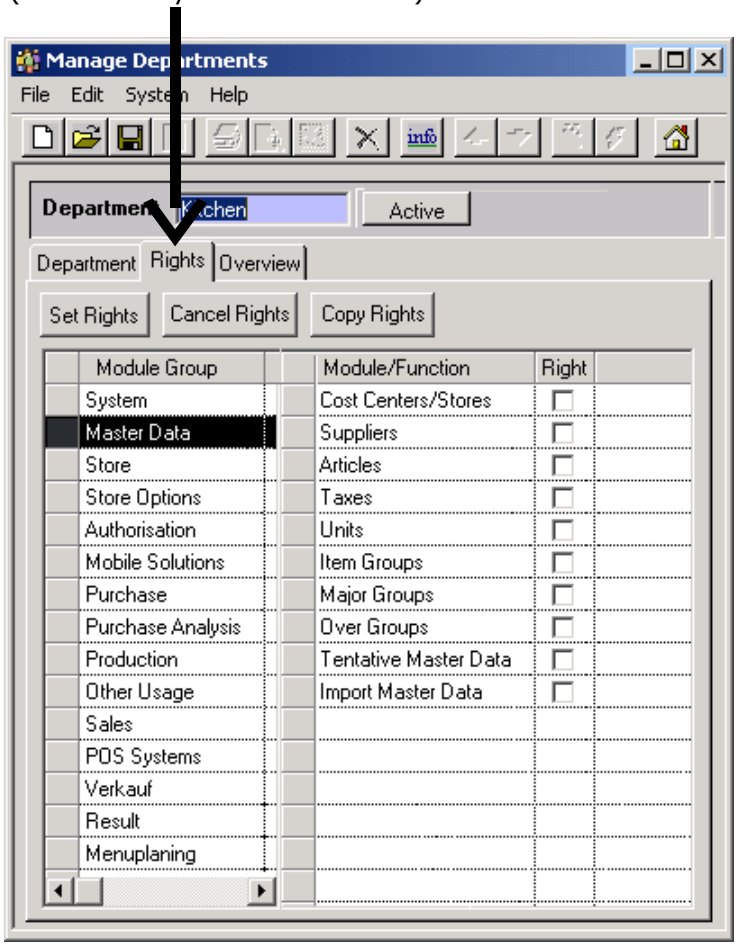

The following screen appears:

Department **:** Type the name of the user group

Assigning Group Rights

Click on the "Rights" tab (as shown by the arrow below)

Give the access rights to the group by ticking the check box beside the function described.
