Materials Control Procedures for Inserting and Using Par Stocks.

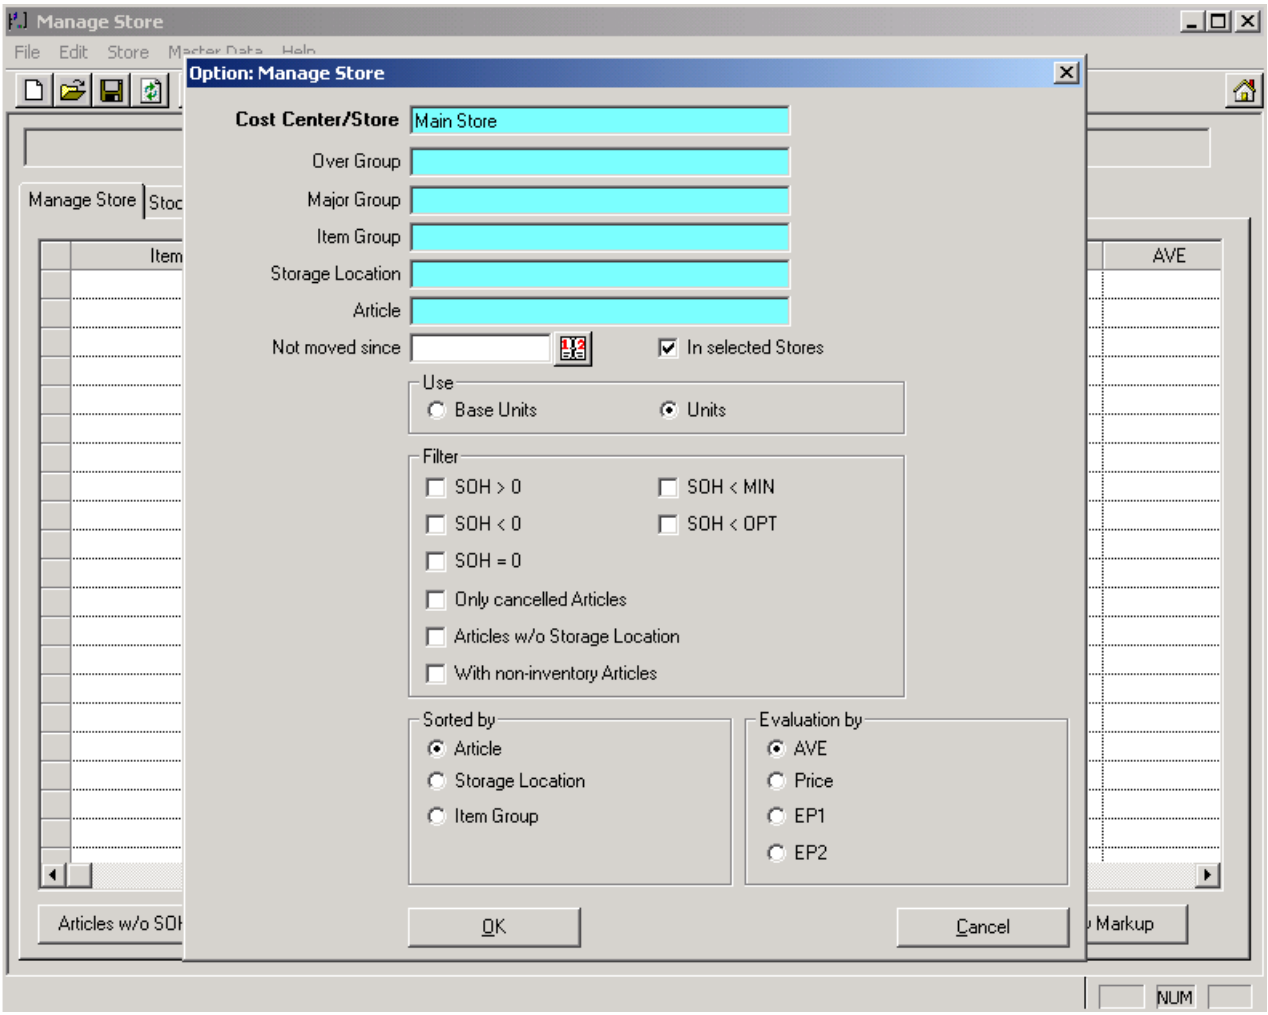

This document is meant to give procedures for inserting par stocks for each store/ outlet.
These par stocks will then be used to place Issue Requests from Main Stores and for Main Stores to place Purchase Requests.

Inserting Par Stocks.

Click on the Manage Store icon 

, under the Store short-cut bar.

The following window appears:

On this window, insert the following:

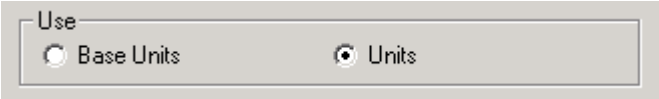

Cost Centre/ Store : Enter the Cost Centre/ Store/ Outlet for which you would like to set par stocks.

Over Group :
Major Group :
Item Group :
Storage Location :
Article :

These are optional fields to filter the group of articles e.g. Beers, Sodas, Beef Products etc.

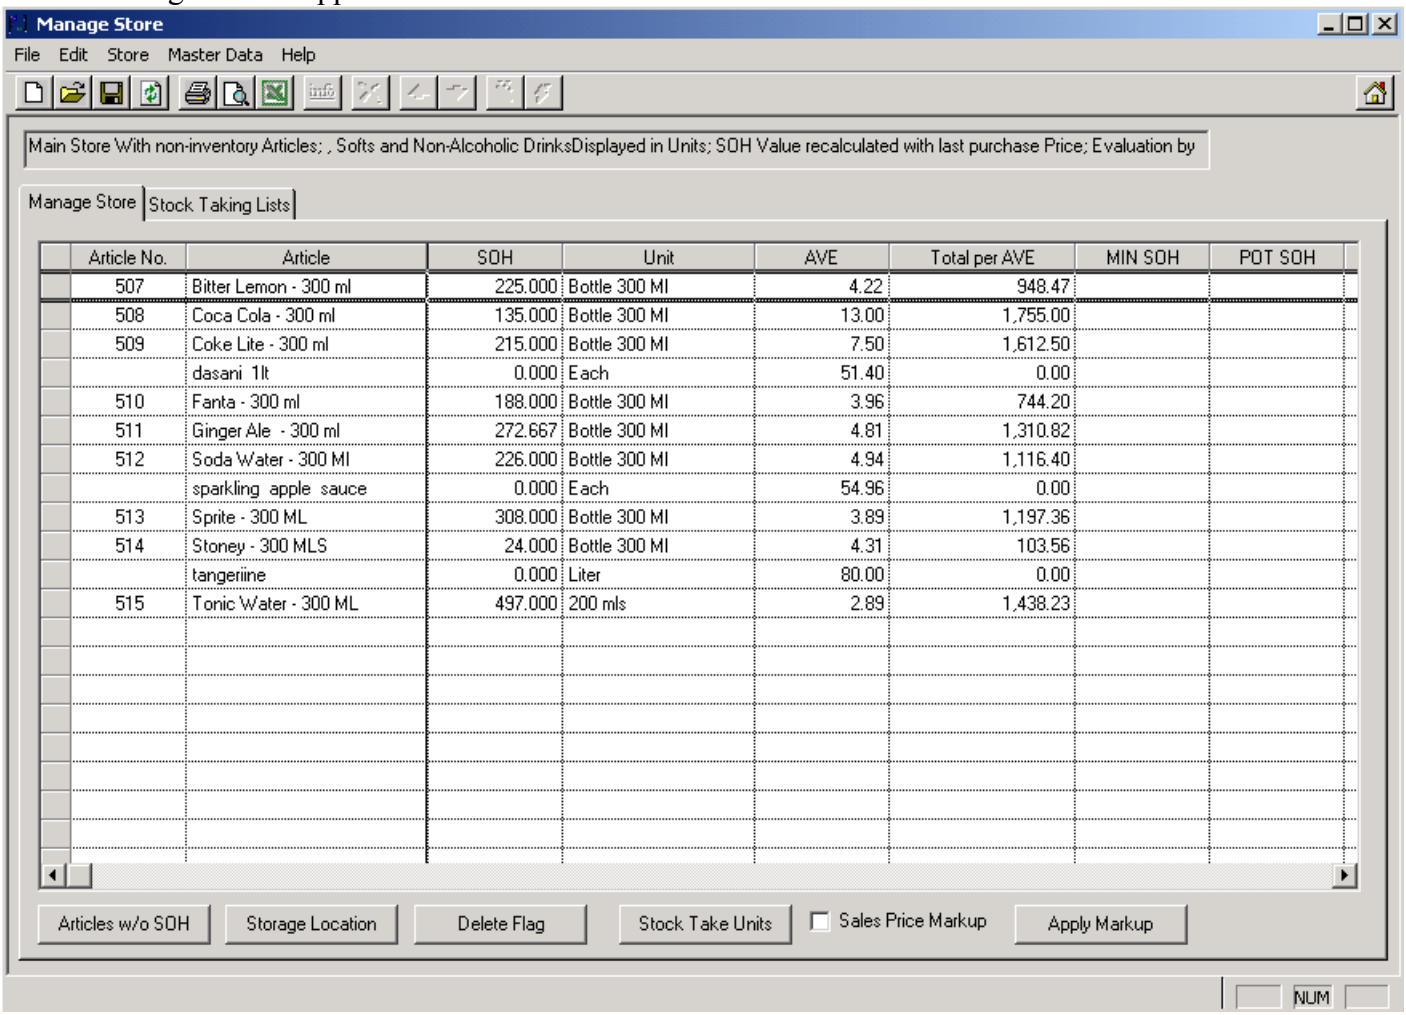

To apply a filter, Press Enter and select from the list.

On the following section, select **Units** :

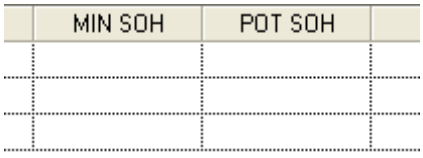

Click **OK**

The following window appears:

Select an item and click the cursor on the MIN SOH and POT SOH column to set the par stock levels:

Note the following:

- **MIN SOH = The Minimum inventory that should be held in the store/ outlet**
- **POT SOH = The target inventory that should ideally be held**
- **If you selected 'Base Unit' on the following section :**

Then you have to convert the par stock quantities to the equivalent of the Base Unit:
e.g. ***Units*** **>** ***Egg (Crate)*** **=** ***2*** *(Crates)……..store unit is crate*
Base Unit **>** ***Egg (Crate)*** **=** ***60*** *(Each)…… base unit is each*

When all the par stocks of the articles have been set then click on the '**Save**' Icon 

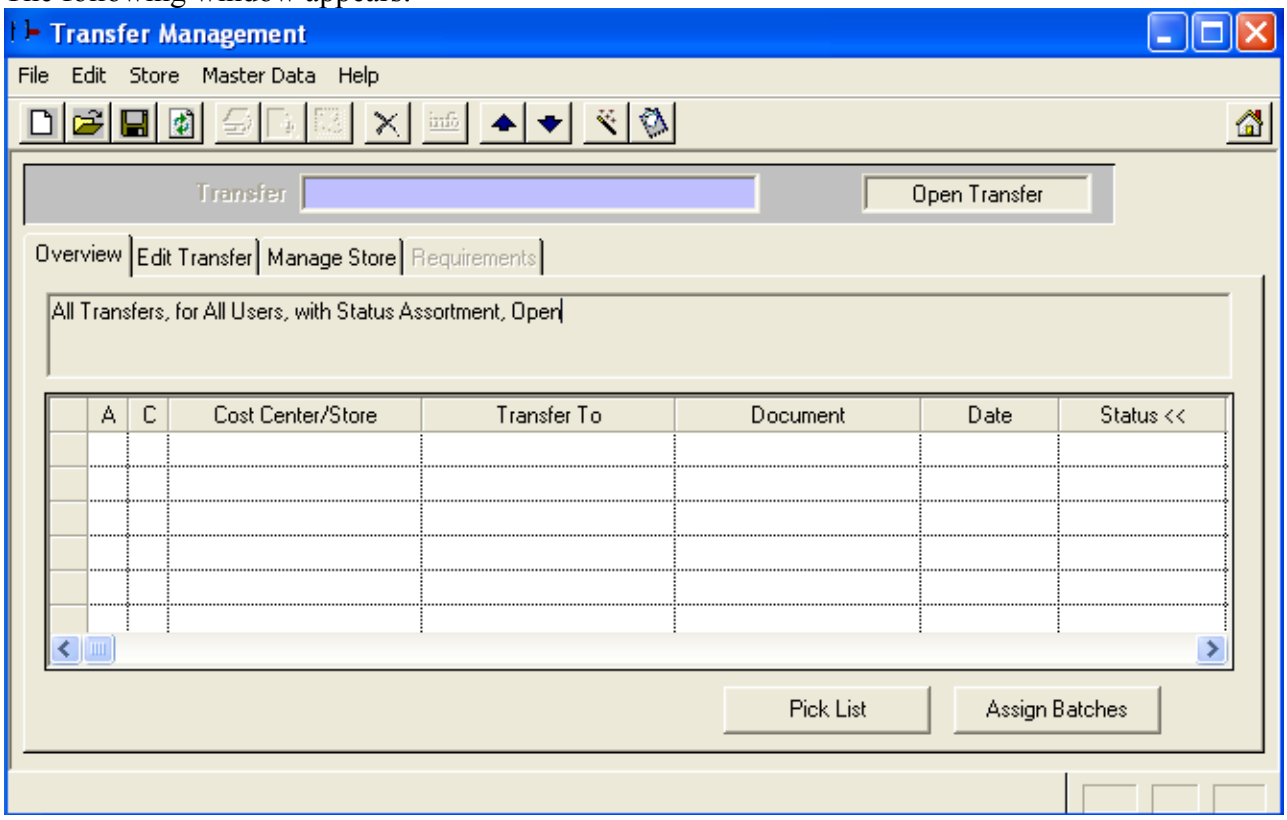

PLEASE REPEAT THE ABOVE PROCEDURE TO SET PAR STOCKS FOR ALL STORES/ OUTLETS.

Placing an Purchase Request Based on current stock on hand and Par Stocks.

Please note that this is meant to be done for Main Stores only.

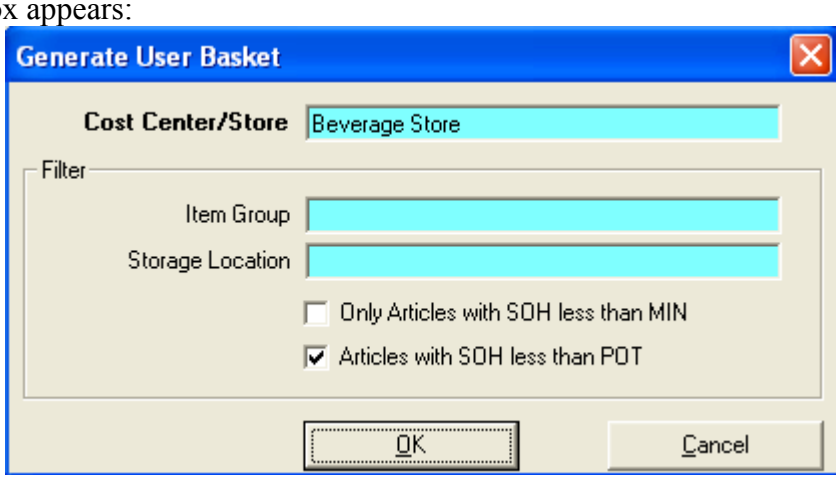

Click on the '**Transfers**' icon 

The following window appears:

On this window click on the '*Clip Board*' icon 

The following box appears:

Cost Centre/ Store : The Main Store that wants to generate the articles it requires

Item Group :
Storage Location :

These are optional fields to filter the group of articles e.g. Beers, Sodas, Beef Products etc.

To apply a filter, Press Enter and select from the list.

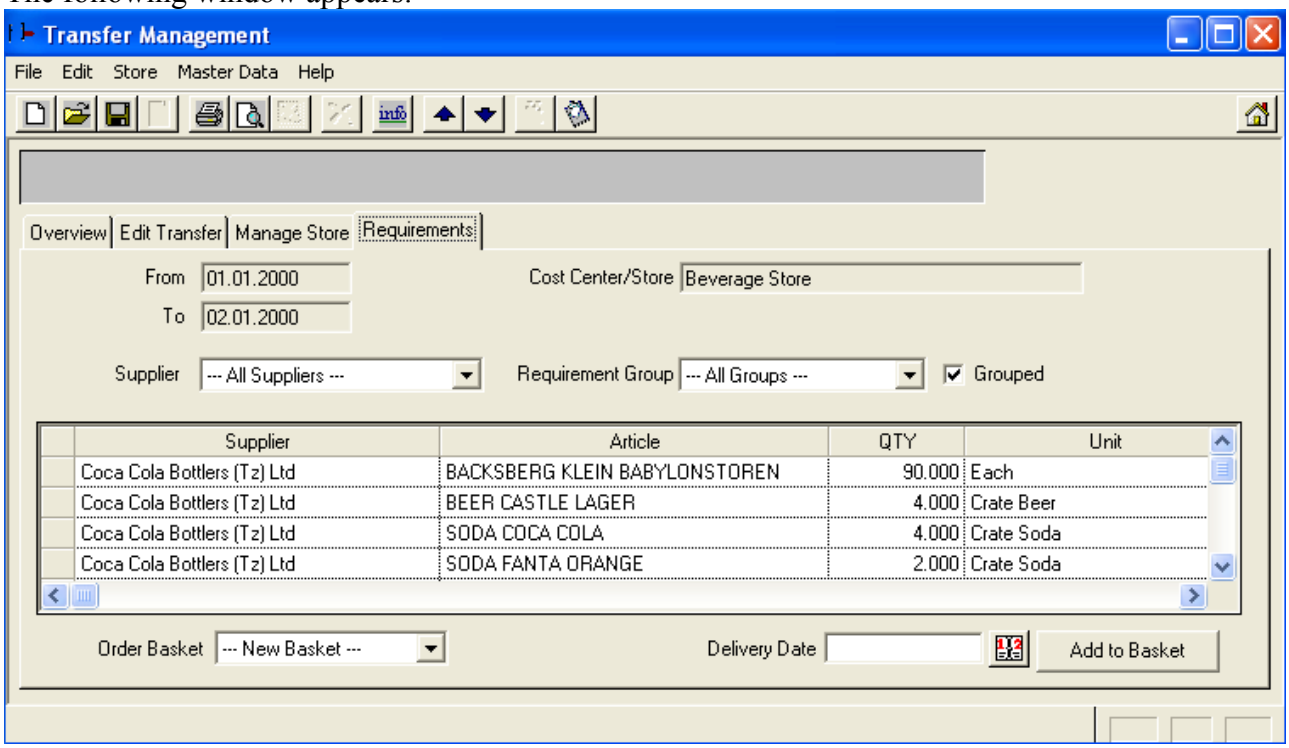

☑ Only Articles with SOH less than MIN : Tick this check box if you want to replenish only those articles whose stock quantities below the MIN SOH par level set.

☑ Articles with SOH less than POT : Tick this check box if you want to replenish all the articles upto their POT SOH par level set.

NB : In both cases the quantity requested will be the difference from the POT SOH par level set.

Click **OK**

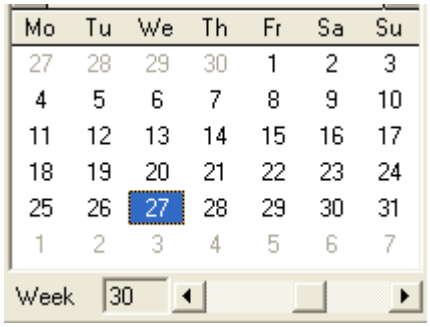

The following window appears:

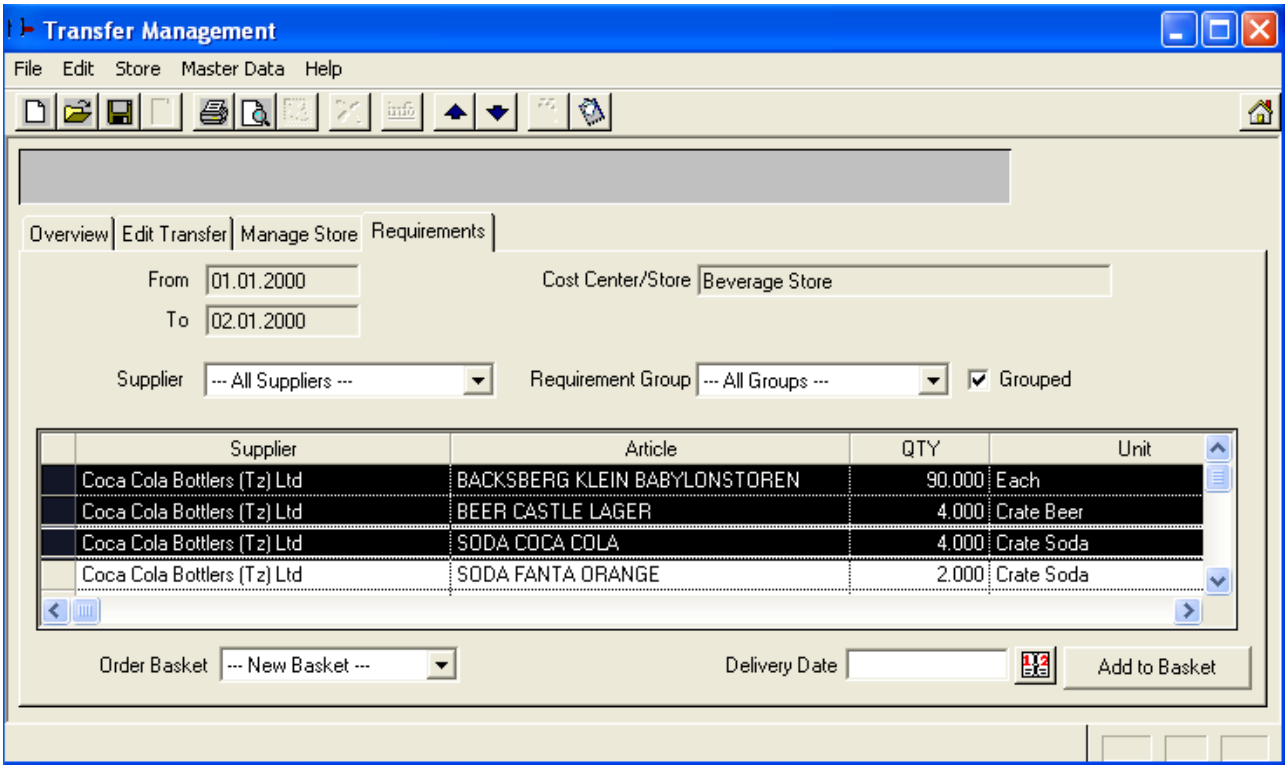

On this window:

- First, click on the Calendar Icon 

and double-click on the proposed delivery date when these items are needed.

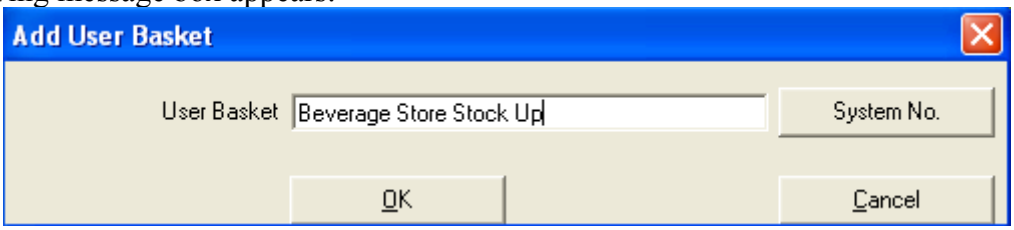

- Secondly, **Highlight** the articles that you want to place an order request for, as below:

- Thirdly, Click on '**Add to Basket**' 

The following message box appears:

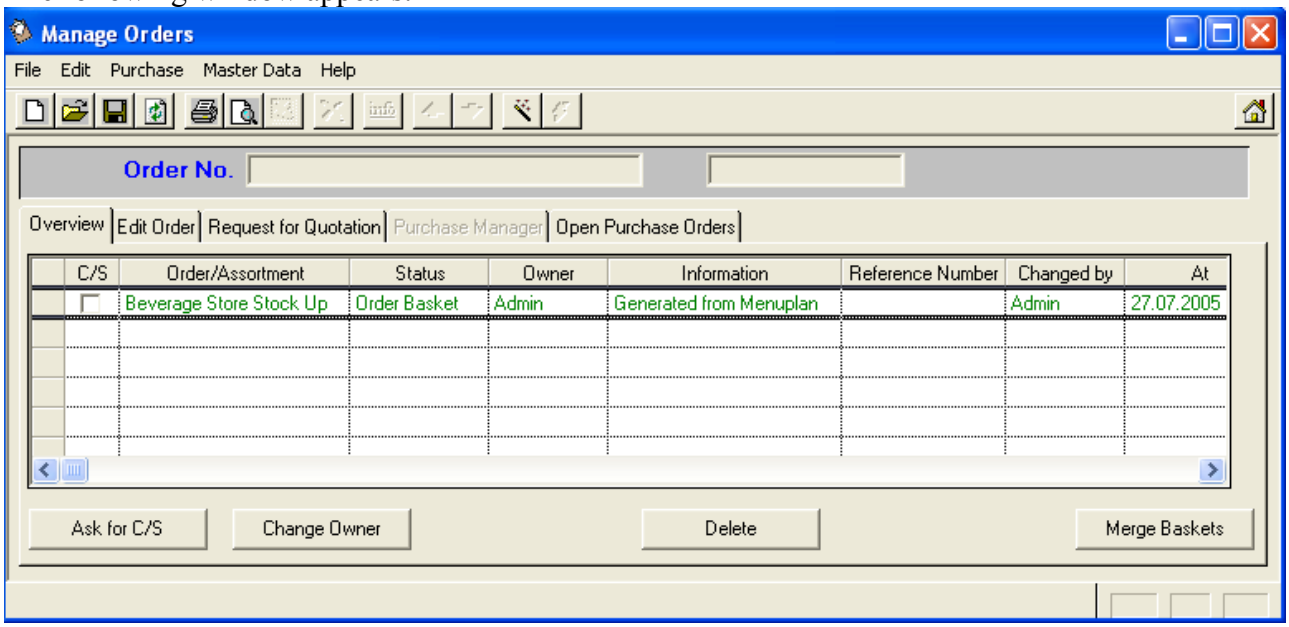

Type any information to identify this Purchase Request and then click **OK**.

AFTER THIS STAGE, THE PURCHASE OFFICER OF YOUR ORGANIZATION WILL PICK IT UP WHEN THEY ACCESS THE PURCHASE ICON.

Making an LPO from a Purchase Request made through the Par Stock method of stocking up (*from above*).

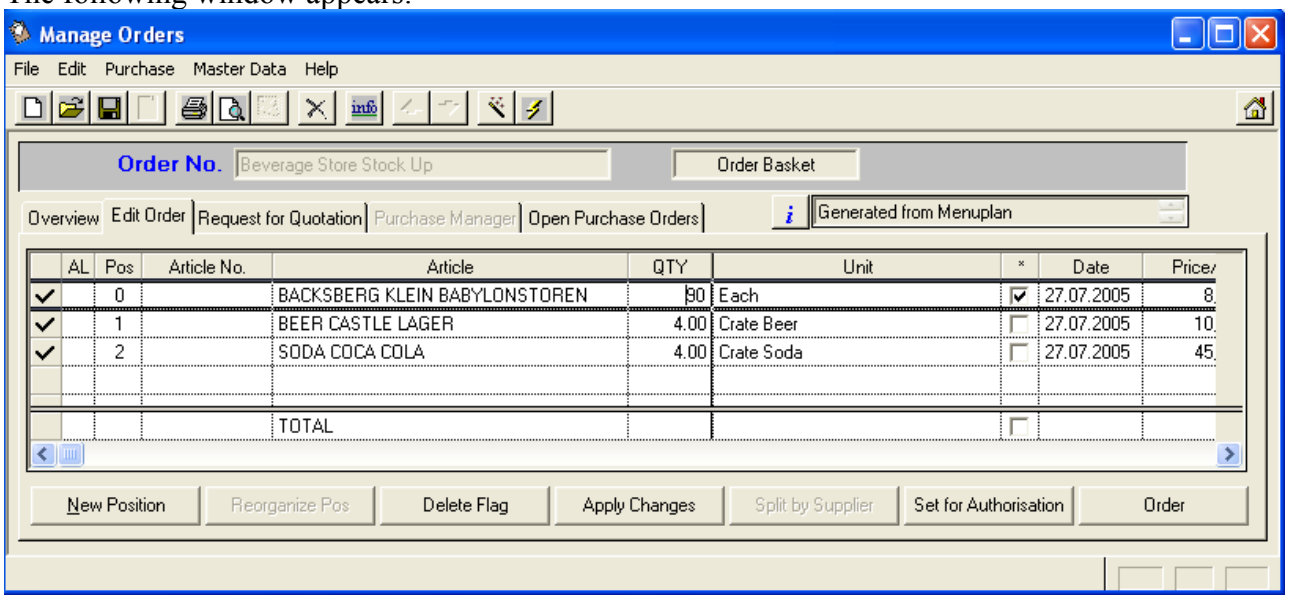

Click on the '**Purchase Orders**' Icon 

The following window appears:

On this identify the purchase request from the name given to it, *e.g. Beverage Store Stock Up*

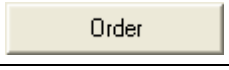

Double-click on it.
The following window appears:

On this window, change the quantity in the '**QTY**' column and purchase prices in the '**Price/Unit**' column if need be.

To change suppliers, delivery date or store click on the'**Apply Changes**' button 

Lastly, if authorisation is required then click on '**Set for Authorisation**' 

Or else simply click on '**Order**' 

to generate an LPO.
